PART 2

An SEA Scoping Report is attached for the plan, programme or strategy entitled

Aberdeenshire Open Space Strategy

The Responsible Authority is:

Aberdeenshire Council

PART 3

Please tick the appropriate box

YES The PPS falls under the scope of Section 5(3) of the Act and required an SEA under the Environmental Assessment (Scotland) Act 2005. **Or**

The PPS falls under the scope of Section 5(4) of the Act and required an SEA under the Environmental Assessment (Scotland) Act 2005. **Or**

The PPS does not require an SEA under the Environmental Assessment (Scotland) Act 2005. However, we wish to carry out an SEA on a voluntary basis. We accept that, as this is voluntary, the statutory 5-week timescale for views from the Consultation Authorities cannot be guaranteed.

1. Introduction

The purpose of this Strategic Environmental Assessment Scoping Report is to set out sufficient information on Aberdeenshire Open Space Strategy to enable the Consultation Authorities to form a view on the consultation period and scope/level of detail that will be appropriate for the Environmental Report. This report has been prepared in accordance with the Environmental Assessment (Scotland) Act 2005.

2. Key Facts about Aberdeenshire Open Space Strategy

Name of Responsible Authority	Aberdeenshire Council
Title of PPS	Aberdeenshire Open Space Strategy
What prompted the PPS	Required by SPP 11
Subject	Open Space
Period covered by PPS	2009-2014
Frequency of updates	Every 5 years or more frequently if required
Area covered by PPS	Aberdeenshire (excluding Cairngorms National Park)
Purpose and/or objectives of PPS	The purpose of PPS is to provide a coherent framework for managing Aberdeenshire's open and green spaces consistent with the provisions of SP11.
Contact Point	Irina Birnie Project Co-ordinator – Open Space Transportation & Infrastructure Landscape Services Harlaw Way Inverurie AB51 4SG 01467 624827 irina.birnie@aberdeenshire.gov.uk

3. Description of the Content of Aberdeenshire Open Space Strategy

Strategic Objectives of Aberdeenshire Open Space Strategy 2009-2014

- 1 To improve policies and procedures in relation to the management of open space.
- 2 To promote open space as a major contributor to mental and physical wellbeing.
- 3 To promote open space as the heart of community identity and cohesion
- 4 To improve the landscaping and visual appearance of communities.
- 5 To conserve habitats and biodiversity
- 6 To promote integration between Sustainable Urban Drainage Systems (SUDS) and public open space.
- 7 To develop the resources and structures required to implement the Strategy.

The following table shows how these are translated into objectives and actions for Aberdeenshire Open Space Strategy

Table 3.1: Objectives and Actions

OSS 2009-2014 Strategic Objectives		Actions	
1	To improve policies and procedures in relation to the management of open space.	1.1	Develop a standards based policy for inclusion within the Local Development Plan.(LDP)
		1.2	Provide justification within LDP settlement statements for detailed application of the policy, based on the findings of the open space audit.
		1.3	Set the framework for masterplans and land allocations
		1.4	Develop robust mechanisms for the funding and maintenance of the open space resource.
		1.5	Review information from Section 75 monitoring spreadsheets (s75 Developer Contributions to communities).
		1.6	Take account of views of local communities in the above.
2	To promote mental and physical wellbeing.	2.1	Provide recreational and exercise opportunities across all age groups.
		2.2	Ensure a range of appropriate options is available to male and female user groups.
		2.3	Ensure a range of open space types is accessible to all residents of Aberdeenshire.
		2.4	Ensure optimum linkage through integration with core paths plan
		2.5	Promote an urban design culture in which greenspace is visually accessible from everyone's' home.
		2.6	Build in capacity for local food production

- | | | |
|---|--|--|
| 3 | To promote community identity and cohesion | <ul style="list-style-type: none"> 3.1 Provide gathering places for residents 3.2 Build in capacity for local food production 3.3 Draw on and develop public art resource 3.4 Provide visual and social focus for communities |
| 4 | To improve the landscaping and visual appearance of communities. | <ul style="list-style-type: none"> 4.1 Ensure open space is located for ease of access. 4.2 Ensure open space is structured and designed with a clear function. 4.3 Ensure open space is designed to encourage maximum usage on an annual basis with consciously designed sheltered spaces. 4.4 Soft planting should be primarily based on native plant species and species that support wild life. 4.5 Hard landscaping should use materials appropriate to the tradition of the location. 4.6 Landscape design should be promoted as a significant element of improving this urban environment of Aberdeenshire's settlements. 4.7 Landscape design should be promoted as a significant element of improving the competitive marketability of Aberdeenshire's commercial and industrial areas. 4.8 Landscape open space should be designed to form part of an overall interconnected green space network. 4.9 Each settlement should have a strategic approach to enhance an existing public space and implementing new green space in order to generally improve amenity value, from gateway, along main access routes and into the heart of each settlement. 4.10 Landscape design should be fully integrated with other initiatives including public art, urban design and detailed initiatives including signage and lighting. |
| 5 | To conserve habitats and wildlife | <ul style="list-style-type: none"> 5.1 Minimize interventions to natural spaces, in particular on designated sites. 5.2 Minimize pesticide use on managed open space. Consider linkages to Biodiversity Action Plans 5.3 Minimise use of non-natural surfaces 5.4 Maximise potential of SUDS to enhance biodiversity 5.5 Define minimum percentage of green infrastructure to be included on development sites (including SUDS). 5.6 |
| 6 | To promote integration between the location and management of Sustainable Urban Drainage Systems (SUDS) and the open space resource. | <ul style="list-style-type: none"> 6.1 Maximize potential of SUDS to incorporate biodiversity on developed sites (see above) 6.2 Maximize potential contribution of SUDS as a landscape feature, adding identity to communities. 6.3 Encourage use of major applications process to design in and agree maintenance of SUDS at pre-application stage. 6.4 Ongoing liaison with partners including Scottish Water to achieve satisfactory outcomes in above respects. |

- | | | | |
|---|--|-----|--|
| 7 | To develop the resources and structures required to implement an integrated Strategy | 7.1 | Raise the profile of open space across the Council with reference to National Outcomes and related strategic priorities across the Services. |
| | | 7.2 | Increase expectation of open space provision as part of a wider drive to improve the sense of place and design within our communities. |
| | | 7.3 | Target planning contributions to maximum effect in terms of delivering quality, functional open space. |
| | | 7.4 | Promote cross-Service working on open space issues. |

4. Context of Aberdeenshire Open Space Strategy

4.1 Relationship with other PPS and environmental objectives

The Environmental Assessment (Scotland) Act 2005 requires that the Environmental Report includes an outline of the Open Space Strategy’s relationships with other relevant PPS and how environmental protection objectives have been taken into account in the Open Space Strategy preparation. This section covers these issues and describes the policy context within which the Open Space Strategy operates, and the constraints and targets that this context imposes on it. Table 4.1 lists the plans, programmes, strategies and environmental objectives that we propose to analyse for their relationship with Aberdeenshire Open Space Strategy. Appendix 7.1 shows a more detailed analysis.

68	Aberdeenshire Council Pitches Strategy (draft report July 2008)
69	Aberdeenshire Council Sports and Active Lifestyles Strategy 2005-2008

From the analysis of the relevant plans, programmes and environmental protection objectives, the key points arising from this analysis are that Aberdeenshire Open Space Strategy should:

- Protect and promote the physical and mental wellbeing of human beings especially those living in towns and cities
- Avoid adverse impacts on statutory and non-statutory protected sites for natural heritage interests i.e. habitats, species, earth science interests and landscape interests e.g.
 - Internationally important Special Areas of Conservation (SACs) and Special Protection Areas (SPAs) designated under the terms of the Conservation Regulations 1994
 - Nationally important Sites of Special Scientific Interest (SSSIs) notified under the terms of the Wildlife and Countryside Act 1981
 - Nationally important areas for landscape and visual amenity ie National Scenic Areas and Cairngorms National Park
 - Regionally important wildlife and landscape sites i.e. Sites of Interests to Natural Science (SINS), Areas of Landscape Value (ALVs).

- Locally important wildlife sites ie Local Nature Reserves (LNRs)
- Ensure compliance with statutory provisions for statutory protected species and with regional biodiversity plans e.g.
 - EPS (e.g. otters and bats), Wildlife and Countryside Act schedule 1 species (e.g. golden eagle),
 - Wildlife and Countryside Act schedule 5 species (eg red squirrel and water vole),
 - the Protection of Badgers Act,
 - and with objectives of North East Scotland Biodiversity Action Plan (eg aspen hover fly and wych elm)
- Promote biodiversity, maintain and restore natural habitats and habitat networks.
- Maintain and support landscape character and local distinctiveness.
- Promote the provision of access links to adjacent access routes eg core path network, or existing footpaths
- Promote sustainable use of water and mitigate the effects of floods and droughts;
- Encourage the promotion of sustainable communities that focus on the sustainable use of natural resources;
- Support strategies that help to limit or reduce the emissions of greenhouse gases;
- Support strategies that help to limit or reduce the emissions of pollutants;
- Promote good design, safe environment, clean environment and good quality services;
- Promote sustainable alternatives to car and reduce congestion traffic pollution through the location of buildings;
- Promote economic growth, social Inclusion, environmental improvement, health and safety;
- Promote strategies that do not degrade the coastal environment;
- Promote the economy, support the community and the public service;
- Set a framework for development consents for major housing developments.
- Help to promote protect and, where appropriate, enhance the historic environment
- Seek to promote watercourses as valuable landscape features and wildlife habitats
- Ensure that the water quality and good ecological status of the Water Framework Directive are maintained

4.2 Relevant aspects of the current state of the environment

The Environmental Assessment (Scotland) Act 2005 Schedule 3 requires that the Environmental Report includes a description of the relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the Open Space Strategy, and the environmental characteristics of areas likely to be significantly affected.

This section aims to describe the environmental context within which the Open Space Strategy operates and the constraints and targets that this context imposes on the Open Space Strategy. Appendix 7.2 below summarises the data collected, the sources and the constraints.

4.3 Likely evolution of the environment without the Open Space Strategy

Without Aberdeenshire Open Space Strategy it is considered that the likely future changes to the area will include:

- Aberdeenshire Council would not be in the position to ensure the delivery of a range of fit for purpose open spaces.
- Adverse effects on mental and physical health of communities.
- A lack of community identity and cohesion, with associated rise in anti-social behaviour.
- Continued loss of habitats and species in urban areas.
- Poor quality of landscape setting of towns and villages; unattractive internal appearance.
- Negative impacts on local economy
- Rise in number of poorly located and badly maintained SUDS
- Less targeted use of developer contributions to enhance local environments
- Ongoing issues of maintenance, in relation to both new and existing open space.

4.4 Environmental Characteristics of Areas Likely to be significantly affected

In the light of the baseline and problems identified for the Open Space Strategy, the environmental characteristics of areas likely to be significantly affected are summarised at Appendix 7.3 (Figures 7.3.1-3 and Tables 7.3.1-2).

Significant issues relating to each SEA topic have been identified in Table 4.2: Environmental Problems.

4.5 Environmental problems

The Environmental Assessment (Scotland) Act 2005 requires that the Environmental Report should include a description of existing environmental problems, in particular those relating to any areas of particular environmental importance. The purpose of this section is to explain how existing environmental problems will affect or be affected by Aberdeenshire Open Space Strategy and whether the Strategy is likely to aggravate, reduce or otherwise affect existing environmental problems.

Environmental problems were identified through discussions with officers from Aberdeenshire Council and analysis of the baseline data. Relevant environmental problems are summarised in Table 4.2.

Environmental problems identified through the analysis of baseline data are listed at Appendix 7.4. Most of these problems are being addressed through the Aberdeen City and Shire Structure Plan, Aberdeenshire Towns Housing Strategy, Aberdeenshire Economic Development Priorities and Aberdeenshire Core Paths Plan. The remaining issues relevant to this Strategy are those summarised in the table below.

Table 4.2: Environment Problems relevant to the Open Space Strategy

SEA Topic	Significant environmental problems	Supporting Data	Implication for Open Space Strategy
Air & Climatic factors	<ul style="list-style-type: none"> • Users may opt to reach OS facilities using private motorised access, leading to a reduction of air quality and increase in congestion. • Construction of facilities and surfacing may use materials and products high in embodied CO2, leading to indirect increases in carbon emissions. • Use of pesticides high in embodied CO2 may have knock on effect on carbon emissions. • Provision of accessible fit for purpose open space in settlements may work against government requirement for 'efficient use of land.' • Some types of recreation of sport may have a greater ecological/carbon footprint than others 	<ul style="list-style-type: none"> • Aberdeenshire Council (2004 & 2005) <i>Local Air Quality Management Progress Report</i> • Scottish Executive (2005) <i>Indicators of Sustainable Development for Scotland: Progress Report 2005</i> • Best Foot Forward (2006) <i>Domestic Carbon Dioxide Emissions for Selected Cities</i>, British Gas http://www.britishgasne.ws.co.uk/managed_content/files/pdf/greenCity.pdf • DEFRA (2005) <i>Greenhouse Gas Inventories for England, Scotland, Wales and Northern Ireland: 1990 – 2003</i>, National Environmental Technology Centre 	<p>Open Space Strategy should discourage dependence on fossil fuels</p> <p>Open Space Strategy should contain measures to minimise direct and indirect CO2 emissions</p> <p>The implementation of the open space strategy should minimise ecological and carbon footprints</p>

Water	<ul style="list-style-type: none"> • Recreational and sporting use of open spaces around watercourses could degrade water quality. • Poor design and maintenance of SUDS in developing and managing open space facilities could exacerbate flooding and pollution problems. • Run-off from pesticides effecting water quality. • Increased need to abstract water for the development of sporting use of open space facilities 	<ul style="list-style-type: none"> • Aberdeen and Aberdeenshire Councils (2006) <i>Topic Paper: Strategic Flooding Issues</i> • Centre for Hydrology and Ecology (River Flow – gauging stations) (2004): http://www.nwl.ac.uk/ih/nrfa/station_summaries/op/SEPA-north_map.html • SEPA: http://www.sepa.org.uk/data/river_levels/data.htm 	<p>Open Space Strategy should contain measures to protect water quality</p> <p>The implementation of the Open Space Strategy should ensure efficient design and management of SUDS</p> <p>The implementation of Open Space Strategy should minimise pollution from pesticides</p> <p>Open Space Strategy should encourage the sustainable use of water, and identify the more water intensive sporting developments.</p>
Soil quality	<ul style="list-style-type: none"> • Soil erosion arising from the use of open spaces for recreational purposes, especially in areas of steep topography. • Soil sealing and compaction arising from the development of open space and recreational facilities and activities. • Substance used in constructing and equipping facilities, and cleaning and repairing open space and recreational facilities, could contaminate the soil. • Negative impacts on the soil resource from climate change, itself exacerbated by inappropriate use of products in pursuit of open space provision and maintenance; or, the support and promotion of carbon-intensive sporting activities. 	<ul style="list-style-type: none"> • Aberdeenshire Council <i>Contaminated land Strategy (under review Dec 2006)</i> • Aberdeenshire Council: <i>Public Register of Contaminated Land</i> • Scottish Executive Statistics (2005): <i>Economic Report on Scottish Agriculture</i> • <i>EU Thematic Strategy on Soil Protection COM(2006)231</i> 	<p>Open Space Strategy should minimise soil erosion, sealing, compaction, and contamination</p> <p>Strategy should include an indicative assessment of the ecological footprint of various types of sporting activity.</p>

<p>Biodiversity</p>	<ul style="list-style-type: none"> • Increased risk of disturbance to sensitive habitats and species if recreational open space is located near these areas. • Potential disturbance to European Protected Species (bats, badgers and otters) • Damage to habitats and species arising from use of toxic materials in open space management. • Damage to habitats and species arising from increased litter from urban populations. • Damage to micro-organisms in soil from the use of non-permeable surfaces, or erosion, sealing and compaction arising from overuse of sites. • Loss of habitats and species arising from climate change, itself exacerbated by use of products and material with a high carbon footprint, and support and promotion of sporting activities with high carbon impact. • Severance of links between greenspaces could limit migration of species across different areas. 	<ul style="list-style-type: none"> • NE Biodiversity Action Plan: <i>Action Plans: & Action Updates</i> www.nesbiodiversity.org.uk/habactionplan.htm • Aberdeen and Aberdeenshire Council (2006) <i>Natural Heritage Topic Paper</i> 	<p>Open Space Strategy to protect statutory protected species and non-statutory protected species of conservation interest in addition to designated and non-designated sites.</p> <p>Open Space Strategy to work with EL&L and external partners e.g. KSB to discourage litter in urban areas.</p> <p>Open Space Strategy should risks of compaction, erosion and sealing.</p> <p>Need for Strategy to require application of sustainable purchasing policy in respect of equipment and products for open space.</p> <p>Open Space Strategy to maintain and promote links where this is beneficial to biodiversity. Also, to have regard to Forest Habitat Networks to promote optimum habitat provision.</p>
---------------------	---	--	--

<p>Human health</p>	<ul style="list-style-type: none"> • Inadequate open space provision generally will contribute to growth in obesity and a range of physical and mental health problems. • • Inadequate measures to redress rising levels of inactivity among children and young people, especially girls, will exacerbate this trend. • Lack of pro-active measures to provide for hard to reach groups to engage in physical activity (children displaying 'at risk' behaviour, teenage girls) will exacerbate long-term well-being in these groups. • Inadequate scope for young women to engage as leaders of physical activities will compound lack of confidence and self-esteem in this group, with associated rise in crime and anti-social behaviour. • Lack of appropriate provision for elderly will lead to increasing isolation from communities in which they live, a lack of exercise, and a poor quality of life. • Potential conflicts between different user groups eg. riders, cyclists, walkers could lead to increased safety risks. • Severance of links between residential areas and recreational sites could limit opportunities for exercise and recreation. And provision of access e.g. footpath links to existing networks is significant environmental issue. • Use of pesticides on farmland adjacent to amenity areas could be detrimental to health 	<ul style="list-style-type: none"> • Aberdeenshire Council (2004) <i>Scottish Index of Multiple Deprivation (Oxford Report) – Aberdeenshire: Key findings</i> http://www.aberdeenshire.gov.uk/statistics/economic/SIMD%20Abshire%20Key%20Findings%202004.pdf • Aberdeenshire Council (2002) <i>Sports and Active Lifestyles Strategy</i> (for the period 2002 to 2005). <p>High Court Ruling 14/11/2008 in RE: Georgina Downs Vs. DEFRA</p>	<p>Open Space Strategy to provide for adequate access to the natural environment.</p> <p>Open Space Strategy to highlight barriers to participation in respect of at risk groups. To contain measures to redress the balance of provision either in the type or location of open space.</p> <p>Strategy to consider role of associated facilities e.g. W.C.s in overcoming access issues</p> <p>Open Space Strategy to monitor potential user conflicts</p> <p>Open Space Strategy to maintain and promote links between open spaces.</p> <p>Open Space Strategy to consider introduction of 'no-spray' zones around play areas and other amenity space</p>
---------------------	--	--	---

Population	<ul style="list-style-type: none"> Increasing number of households is creating more demand for access to open space. The need for more development land is placing pressure on existing open space. Ageing population will create demand for certain types of open space and recreational facilities. 	<ul style="list-style-type: none"> Aberdeen City and Aberdeenshire Councils (2006) <i>Topic Paper: Population and household change</i> <i>Register for General Scotland</i> (2006) Mid-2005 Population Estimates Scotland Population estimates by sex, age and administrative area, A National Statistics publication. 	Open Space Strategy to address demand and meet the needs of diverse populations
Cultural heritage	<ul style="list-style-type: none"> The potential for significant effects on the historic environment from the inappropriate siting of sports and recreational facilities. Recreational and sporting activities could damage historical features through carelessness and foot fall. 	<ul style="list-style-type: none"> Aberdeen City and Aberdeenshire Councils (2006) <i>Topic Paper: Built Heritage</i> Scottish Executive (1999) <i>NPPG18: Planning and the Historic Environment</i> 	Open Space Strategy should protect and, where appropriate, enhance or restore the historic environment
Landscape	<ul style="list-style-type: none"> Inadequate care in the layout open space and facilities could fail to maximise its potential benefits in terms of enhancing the landscape. Open space provision has capacity to negatively impact on landscapes, including designated landscape protection areas, if siting and materials not given due consideration. 	<ul style="list-style-type: none"> Scottish Natural Heritage (1997) National programme of landscape character assessment: Banff and Buchan, Review No 37. Scottish Natural Heritage (1998) South and Central Aberdeenshire: landscape character assessment, Review No 102. 	Open Space Strategy should have measures designed to conserve and enhance landscape character and scenic value of settlements and their surroundings.
Material assets	<ul style="list-style-type: none"> Lack of recreational and sporting assets designed to meet the needs of groups identified as having barriers to participation in sport and accessing open space. Lack of adequate open space facilities that enhances the economic value of all assets and property owned by the people living in Aberdeenshire 	<i>SPP11: Open Space and Physical Activity</i>	<p>Open Space Strategy should identify where lack of material assets is disadvantaging particular sections of society from accessing open space and participating in exercise and sport.</p> <p>Strategy to propose measures to encourage investment in these assets.</p>

5 Scope and Level of Detail Proposed for the SEA

5.1 Alternatives/Options Considered

Although alternatives to the open space strategy are limited two alternatives have been considered. Alternatives are outlined here in order to set the context for the following two sections of this report, i.e. scoping of SEA issues and consideration of a framework for the assessment of environmental effects of the alternatives.

Option 1 – Do Nothing: This is not developing the Open Space Strategy. This is however not an option as failure to develop the strategy would contravene the provisions of SPP 11. Not developing the strategy also means that a number of those problems identified under Table 4.2 in relation all environmental issues would not be addressed.

Option 2 – Do Optimum: SPP 11 is the driver for this option. Under this option, Aberdeenshire Council will develop an evidence-based Open Space Strategy. The Council will have the opportunity to review existing policies, findings of the greenspace audit, and public consultation feedback relating to open space provision. The Strategy will include proposals for ongoing monitoring and feedback, as well as detailed maintenance and funding proposals.

5.2 Scoping in/out of SEA issues

In accordance with Schedule 2 of the Environmental Assessment (Scotland) Act 2005 Aberdeenshire Council has considered whether the environmental effects (positive and negative) of Aberdeenshire Open Space Strategy are likely to be significant. From the table of environmental problems identified, the baseline data and from the table of areas likely to be significantly affected, all environmental issues are open to pressures in Aberdeenshire to varying degrees. From the analysis of environmental problems in Table 4.2 above, open space provision and management are likely to have significant impacts on all environmental issues identified. For this reason, we consider that the strategy is likely to have significant environmental effects (positive or negative) on all environmental issues. We therefore scope in all environmental issues. A summary of our conclusions is given in Table 5.1

Table 5.1. Scoping of SEA issues

SEA issues	Scoped in	Scoped out	If scoped out, why
Biodiversity, flora, fauna	Yes		
Population	Yes		
Human health	Yes		
Soil	Yes		
Water	Yes		
Air	Yes		
Climatic factors	Yes		
Material assets	Yes		
Cultural heritage (including architectural and archaeological heritage)	Yes		
Landscape	Yes		

5.3 Framework for assessing environmental effects

This strategy is assessed against the environmental issues. The effects of the Open Space Strategy will be predicted in terms of negative, positive, uncertain or neutral effects. The effects will further be evaluated to determine their significance on environmental receptors in terms of reversibility or irreversibility of effects, risks, duration - permanent, temporary, long-term, short-term and medium-term - and cumulative - direct, indirect, secondary and synergistic. Table 5.2 and Table 5.5 show the framework that will be used to assess the environmental effects of the options, strategic objectives and actions.

Table 5.2: Assessment of effects - Options

Table 5.4: Assessment of the Actions of the OSS

	Strategic Objectives	SEA Topics	Biodiversity (flora and	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments	
		Actions												
1	To improve policies and procedures in relation to the management of open space.	1.1 Develop a standards based policy for inclusion within the Local Development Plan.(LDP)												
		1.2 Provide justification within LDP settlement statements for detailed application of the policy, based on the findings of the open space audit.												
		1.3 Set the framework for masterplans and land allocations												
		1.4 Develop robust mechanisms for the funding and maintenance of the open space resource.												
		1.5 Review information from Section 75 monitoring spreadsheets (s75 Developer Contributions to communities)												
		1.6 Take account of views of local communities in the above.												

	Strategic Objectives	SEA Topics	Biodiversity (flora and fauna)	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments	
		Actions												
2	To promote mental and physical wellbeing.	2.1 Provide recreational and exercise opportunities across all age groups.												
		2.2 Ensure a range of appropriate options is available to male and female user groups.												
		2.3 Ensure a range of open space types is accessible to all residents of Aberdeenshire.												
		2.4 Ensure optimum linkage through integration with core paths plan												
		2.5 Promote an urban design culture in which greenspace is visually accessible from everyone's' homes.												
	2.6 Build in capacity for local food production													

	Strategic Objectives	SEA Topics	Biodiversity (flora and fauna)	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments
		Actions											
3	To promote community identity and cohesion	3.1 Provide gathering places for residents											
		3.2 Build in capacity for local food production											
		3.3 Draw on and develop public art resource											
		3.4 provide visual and social focus for communities											

	Strategic Objectives	SEA Topics	Biodiversity (flora and fauna)	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments
		Actions											
4	To improve the landscaping and visual appearance of communities.	4.1 Ensure open space is located for ease of access.											
		4.2 Ensure open space is structured and designed with a clear function.											
		4.3 Ensure open space is designed to encourage maximum usage on an annual basis with consciously designed sheltered spaces.											
		4.4 Soft planting should be primarily based on native plant species and species that support wild life.											
		4.5 Hard landscaping should use materials appropriate to the tradition of the location.											
		4.6 Landscape design should be promoted as a significant element of improving this urban environment of Aberdeenshire's settlements.											
		4.7 Landscape design should be promoted as a significant element of improving the competitive marketability of											

		Aberdeenshire's commercial and industrial areas.											
		4.8 Landscape open space should be designed to form part of an overall interconnected green space network.											
		4.9 Each settlement should have a strategic approach to enhance an existing public space and implementing new green space in order to generally improve amenity value, from gateway, along main access routes and into the heart of each settlement.											
		4.10 Landscape design should be fully integrated with other initiatives including public art, urban design and detailed initiatives including signage and lighting.											

	Strategic Objectives	SEA Topics	Biodiversity (flora and fauna)	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments
		Actions											
5	To conserve habitats and wildlife	5.1 Minimize interventions to natural spaces, in particular on designated sites.											
		5.2 Minimize the use of pesticides on managed open space.											
		5.3 Consider linkages to Biodiversity Action Plans											
		5.4 Minimise use of non-natural surfaces											
		5.5 Maximise potential of SUDS to enhance biodiversity											
		5.6 Define minimum percentage of green infrastructure to be included on development sites (including SUDS).											

	Strategic Objectives	SEA Topics	Biodiversity (flora and	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments	
		Actions												
6	To promote integration between the location and management of Sustainable Urban Drainage Systems (SUDS) and the open space resource.	6.1 Maximize potential of SUDS to incorporate biodiversity on developed sites												
		6.2 Maximize potential contribution of SUDS as a landscape feature, adding identity to communities.												
		6.3 Encourage use of major applications process to design in and agree maintenance of SUDS at pre-application stage.												
		6.4 Ongoing liaison with partners including Scottish Water to achieve satisfactory outcomes in above respects.												

	Strategic Objectives	SEA Topics	Biodiversity (flora and	Air & Climatic factors	Soil	Water	Landscape	Material Asset	Cultural Heritage	Population	Human Health	Overall effect	Comments
		Actions											
7	To develop the resources and structures required to implement an integrated Strategy	7.1 Raise the profile of open space across the Council with reference to National Outcomes and related strategic priorities across the Services.											
		7.2 Increase expectation of open space provision as part of a wider drive to improve the sense of place and design within our communities.											
		7.3 Target planning contributions to maximum effect in terms of delivering quality, functional open space.											
		7.4 Promote cross-Service working											
Key	++=very positive -- = very negative		+= positive - = negative				+/- = mixed 0 = neutral					? = uncertain	

5.4 Cumulative Effect Assessment

A further framework for assessing cumulative and synergistic effects of the strategy is shown in Table 5.5 below

Table 5.5 Cumulative & Synergistic Effects of Plan and Options

Objectives	Strategic Objective 1	Strategic Objective 2	Strategic Objective 3	Strategic Objective 4	Strategic Objective 5	Strategic Objective 6	Strategic Objective 7	Cumulative impacts	Comments
SEA Objective									
Biodiversity									
Air & Climatic factors									
Water									
Landscape									
Soil									
Cultural Heritage									
Material asset									
Population & Human health									

5.5 Proposed Mitigation Measures

The SEA Directive requires that through mitigation measures, recommendations will be made to prevent, reduce or compensate for the negative effects of implementing the strategy. It also seeks to ensure that positive effects identified are enhanced. The proposed framework for mitigating significant environmental effects is shown in Table 5.6

Table 5.6: Mitigation Framework

SEA Issue	Existing problem	Plan Impact	Mitigation Measures	Who is responsible for undertaking the mitigation?	Who or what publication will actually provide the mitigation
Air					
Water					
Soil					
Climatic factors					
Biodiversity (flora and fauna)					
Population and Health					
Cultural Heritage					
Landscape					
Material Assets					

5.6 Monitoring Framework

The Aberdeenshire Council is required to monitor the significant environmental effects arising from the plan implementation. A monitoring report will therefore be integrated into the adopted plan to constantly monitor the significant environmental effects and the proposed framework for monitoring significant environmental effects of the implementation of the plan is shown in Table 5.7 below.

Table 5.7 Monitoring Plan

What needs to be monitored?	What sort of information is required? (Indicators)	Where can the information be obtained?	Are there gaps in the existing information and how can it be resolved?	When should the remedial action be considered?	Who is responsible for undertaking the monitoring ?	How should the results be presented?	What remedial actions could be taken?

5.7 The Appropriate Assessment

Article 6 of the 'Habitats' Directive 92/43/EEC requires that where a plan or project may significantly affect a Natura 2000 site (natural heritage designation of international importance – Special Areas of Conservation, Special Protection areas, and Ramsar (wetland) sites), an Appropriate Assessment may be required. The purpose of the screening exercise will be to identify the likely significant effects on Natura 2000 sites at an early stage. The purpose of the appropriate assessment will then be to consider whether or not the Open Space Strategy will have adverse impacts on the sites' integrity. Scottish Government guidance Assessing Development Plans in Terms of the Need for Appropriate Assessment (May 2006) describes necessary measures to take for the Open Space Strategy to ensure safeguards are in place that will avoid adverse impacts on site integrity.

The procedure that will be followed to ensure compliance with the Article 6 process will consist of two stages. The first stage is identifying sites where there is likely to be a significant effect and the second stage is undertaking an appropriate assessment.

.

6 Next Steps

6.1 Proposed Consultation Timescale

In order to give an early and effective opportunity to the consultation authorities and the public to express their opinion on the strategy and the environmental report, the period of consultation Aberdeenshire Council intends to specify under Section 16(1)(b) and notify under Section 16(2)(a)(iv) is a minimum of 6 weeks (see Table 6.1).

6.2 Anticipated Milestones

Table 6.1 shows the remaining steps needed for the SEA of Aberdeenshire Council and how these steps would be carried out and described in the Final Environmental Report.

Table 6.1: Proposed Consultation Timescale and Methods

Expected date/duration	Milestone	Comments
5 weeks	Consulting on the Scoping Report	
4 weeks	Collating views on the Consultation	
4 weeks	Take the appropriate action on the Scoping report and the plan as the result of the consultations	
4 weeks	Finalise the environmental report & Appropriate Assessment	
6 weeks	Consulting on the Environmental Report and the Open Space Strategy	
2 weeks	Collating views on the Consultation	
5-8 weeks	Take the appropriate action on the environmental report and the plan as the result of the consultations	
2 weeks	Finalise the environmental report	
4 weeks	Take post-adoption measures	

7 Appendices: Open Space Strategy Context, Baseline & Assessments

Appendix 7.1 - Links to other PPS and objectives

	Name of PPS / Environmental protection objective	Requirements of the PPS	How it affects, or is affected by OSS in terms of SEA issues* at Schedule 3 of the Environmental Assessment (Scotland) Act 2005
	INTERNATIONAL		
1	EC Birds Directive 79/409/EEC	<ul style="list-style-type: none"> • Provide for the protection, management and control of all species of naturally occurring wild birds; • Seeks to preserve habitats for naturally occurring, rare and migratory species 	Biodiversity, Fauna and flora Open Space Strategy should not hinder protection, management and control of species of naturally occurring wild birds
2	EC Habitat Directive	<ul style="list-style-type: none"> • Ensure biodiversity through the conservation of natural habitats and of wild fauna and flora • Maintain or restore natural habitats • Take into account economic, social and cultural requirements and regional and local characteristics 	Biodiversity, Fauna and flora Open Space Strategy should maintain and restore natural habitats to ensure biodiversity
3	European Biodiversity Framework	<ul style="list-style-type: none"> • Promotes the conservation and sustainable use of biological diversity • Emphasises education, training and awareness, research, identification, monitoring and exchange of information 	Biodiversity, Fauna and flora Open Space Strategy should support conservation and sustainable use of biological diversity
4	European Framework on sustainable development 2001	<ul style="list-style-type: none"> • Promote quality of life, coherent and cost effective policy-making; technological innovation; stronger involvement of civil society; and business in policy formulation • Strategies for sustainable economic growth should support social progress and respect the local environment 	All Issues Open Space Strategy support social progress and respect local environment -

5	European Spatial Development Perspective	<ul style="list-style-type: none"> • Emphasises the importance of achieving equality in all regions of the EU, through economic and social cohesion as well as the conservation and management of natural resources and the cultural heritage • It stresses more balanced competitiveness of the European territory 	<p>All Issues Open Space Strategy should have a sustainable vision and provide sustainable spatial policies. This may encompass many issues</p>
6	Kyoto Protocol (1992)	<ul style="list-style-type: none"> • Encourages reduction of emissions of greenhouse gases • UK seeks to reduce emissions of six key greenhouse gases by 12.5% relative 1990 level over the period 2008 to 2012. 	<p>Air & Climatic factors Open Space Strategy should limit or reduce the emissions of greenhouse gases Follow interpretations and targets interpreted into national, regional and local guidance</p>
7	The Johannesburg Declaration on Sustainable Development	<ul style="list-style-type: none"> • Promotes corporate environmental and social responsibility and accountability • Promotes the use of renewable resources, more resource use efficiency and integrated strategies for managing water. 	<p>All Issues Open Space Strategy should encourage increased use of renewable resources and promote SUDS as part of integrated water management.</p>
8	The Sixth Environmental Action Programme of the European Community 1600/2002/EEC	<ul style="list-style-type: none"> • Promotes Clean Air for Europe (CAFÉ); Supports sustainable use of pesticides, conservation of the maritime environment • Favours soil protection, waste prevention and recycling as well as sustainable use of natural resources, and the urban environment 	<p>Air & Climatic factors Open Space Strategy should ensure sustainable use of natural resources, in particular pesticides, and include measures for soil protection wherever appropriate.</p>
9	Water Framework Directive 2000/60/EC	<ul style="list-style-type: none"> • Safeguard the sustainable use of surface water; transitional waters, coastal waters and groundwater • Supports the status of aquatic ecosystems and 	<p>Water Open Space Strategy should consider sustainable use of water and measures</p>

		<p>environments;</p> <ul style="list-style-type: none"> • Addresses groundwater pollution; flooding and droughts; river basin management planning; 	that mitigate the effects of floods and droughts
10	European Landscape Convention	<ul style="list-style-type: none"> • Aimed at the protection, management and planning of landscapes across Europe. Highlights the need for public involvement, and promotes European cooperation on landscape issues. Sets out a range of different solutions that states can apply. 	<p>Landscape Open Space Strategy should look to examples of good practise from other countries, and ensure protection and management of valued landscapes.</p>
11	EU Thematic Strategy on Soil Protection (COM 2006/231)	<p>The overall objective is protection and sustainable use of soil, based on</p> <ul style="list-style-type: none"> • Preventing further soil degradation and preserving its functions when soil is used and its functions are exploited, action has to be taken on soil use and management patterns, and when soil acts as a sink/receptor of the effects of human activities or environmental phenomena, action has to be taken at source. • Restoring degraded soils to a level of functionality consistent at least with current and intended use, thus also considering the cost implications of the restoration of soil. 	<p>Soil Open Space Strategy should protect soil resource</p>
	NATIONAL		
12	Urban White Paper	<ul style="list-style-type: none"> • Promotes attractive, well-kept towns and cities which use space and building well; supports good design and planning which makes it practical to live in a more environmentally sustainable way, with less noise, pollution and traffic congestion • Seeks prosperous towns and cities offering good quality services, health, education, housing, transport, finance, shopping, leisure, and protection from crime that meet the needs of people and businesses wherever they are 	<p>Material Asset, Population & human health Open Space Strategy should promote good design, safe environment, clean environment and good quality services</p>
13	Climate Change: The UK programme	<ul style="list-style-type: none"> • Makes local authorities central to more sustainable 	All Issues

		<p>development and land use, energy efficiency, in housing provision, transport</p> <ul style="list-style-type: none"> • Promotes well-being in communities through energy saving measures/low carbon technologies • Best Value Performance Indicator 180 requires local authorities to benchmark energy use in their operational property 	Open Space Strategy should promote sustainable alternatives to car and reduce congestion traffic pollution
14	Energy White Paper – Our Energy Future – Creating a low carbon economy	<ul style="list-style-type: none"> • Encourages cuts in UK’s carbon dioxide emissions • Commits to Increase the proportion of electricity provided by renewable sources to 10% by 2010, & double the proportion of electricity supplied by renewable by 2020 subject to consumer acceptance • Ensure that every home is adequately and affordably heated 	<p>Air & climatic factors</p> <p>Open Space Strategy should require new sports/recreational development to be more energy efficient and to have some energy provided from renewable resources ; also to promote sustainable alternatives to car use.</p>
15	The UK’s Shared Framework for Sustainable Development (2005)	<ul style="list-style-type: none"> • Encourages living within environmental limits; ensuring a strong, healthy and just society; achieving a sustainable economy; promoting good governance and using sound science responsibly. • Prioritises sustainable production and consumption; climate change and energy; natural resource protection and environmental enhancement; and sustainable communities. 	<p>All Issues</p> <p>Open Space Strategy should promote healthy society, with equal access to open space among different groups.</p>
16	UK Biodiversity Action Plan	<ul style="list-style-type: none"> • Seeks to conserve and enhance biological diversity within the UK and to contribute to the conservation of global biodiversity through all appropriate mechanisms. 	<p>Biodiversity, flora & fauna</p> <p>Open Space Strategy should promote biodiversity</p>
17	Wildlife and Country Act 1981	<ul style="list-style-type: none"> • Gives protection to listed species from disturbance, injury intentional destruction or sale. 	<p>Biodiversity</p> <p>Open Space Strategy should protect wildlife from disturbance, injury intentional destruction</p>
18	Historic Scotland’s Memorandum of Guidance on Listed Buildings and	<ul style="list-style-type: none"> • Provides the context for listed buildings, conservation areas, as well as Gardens and 	Cultural Heritage

	Conservation Areas	<p>Designed Landscapes</p> <ul style="list-style-type: none"> • Clarifies the context for listed building consents and the intervention by planning authorities 	Open strategy should be consistent with designations
19	Meeting the Needs, Priorities, Actions and Targets for Sustainable Development in Scotland (2002)	<ul style="list-style-type: none"> • Prioritises responsible resource use; • Encourages the generation of less energy and use of power from renewable sources; • Encourages better land use planning, alternative service delivery and sustainable transport systems. 	<p>All Issues</p> <p>Open Space Strategy should promote efficient resource use, energy efficiency and layouts which reduce the need to travel</p>
20	Scottish Executive Policy Statement for Scotland - Designing Places	<ul style="list-style-type: none"> • Raises standards of urban and rural development. • Empowers everyone to play a part in shaping the built environment, whether as politicians, developers, planners, designers, opinion-formers or anyone else whose attitudes have a direct or indirect influence on what gets built. 	<p>Population and human health</p> <p>Open Space Strategy should promote the economy, support the community and public service</p>
21	The Conservation (Natural Habitats, &c.) Regulations 1994	<ul style="list-style-type: none"> • Provide for the designation and protection of European sites, of European Protected Species and the adaptation of planning and other controls for the protection of European sites. 	<p>Biodiversity</p> <p>Open Space Strategy should ensure the protection of sites and species designated under EU legislation.</p>
22	The Conservation (Natural Habitats, & C) Amendment (Scotland Regulations 2007	<p>Expands the scope of the existing regulations to include</p> <ul style="list-style-type: none"> • Part 1 of the Water Environment and Water Services (Scotland) Act 2003, the Water Environment (Controlled Activities) (Scotland) Regulations 2005 and National Park authorities <p>It tightens the regulations regarding</p> <ul style="list-style-type: none"> • Surveillance of conservation status of habitats and species • Protection of certain wild animals • Protection of certain wild plants • Monitoring incidental capture and killing • Offence of breaching licence condition • Abstraction and works authorised under water legislation 	<p>Biodiversity</p> <p>The Open Space Strategy should tighten the protection of habitats and species</p>
23	Nature Conservation (Scotland) Act	<ul style="list-style-type: none"> • Sets out a series of measures, which are designed 	Biodiversity, flora & fauna

		<p>to conserve biodiversity and to protect and enhance the biological and geological natural heritage of Scotland.</p> <ul style="list-style-type: none"> • Places a general duty on all public bodies to further the conservation of biodiversity. 	Open Space Strategy should promote biodiversity
24	Passed to the Future	<ul style="list-style-type: none"> • This is Historic Scotland's Policy for the sustainable Management of the Historic Environment • Stresses the value of retaining and where possible and right to do so, re-using existing structures and materials • Explains the continued relevance of traditional building materials and local craft skills 	<p>Cultural Heritage</p> <p>Open Space Strategy should encourage the re-use of existing and traditional structures and materials and protect and enhance archaeological sites.</p>
25	Disability Discrimination Acts 1995 & 2005	<ul style="list-style-type: none"> • Ensures that discrimination law covers all the activities of the public sector; and requires public bodies to promote equality of opportunity for disabled people. • Aims to end the discrimination that many disabled people face and gives disabled people rights in the areas of employment, education, access to goods, facilities and services and buying or renting land or property. 	<p>Population and Human health</p> <p>Open Space Strategy should build the needs of the disabled persons into its strategic actions</p>
26	Physical Activity Strategy	<ul style="list-style-type: none"> • Aims to increase and maintain the proportion of physically active people in Scotland. • Sets targets to achieve 50 percent of adults aged over 16 and 80 percent of all children aged 16 and under who meet the minimum recommended levels of physical activity by 2022 through building healthy public policy, creating supportive environments, strengthening community action, developing personal skills and directing health services at the people who need them most. 	<p>Population and Human health</p> <p>Open Space Strategy should promote physical activities</p>

27	Scottish Historic Environment Policy 1	<ul style="list-style-type: none"> • Sets out the policy for the identification and designation of nationally important ancient monuments • Sets the context to conserve the evidence of Scotland's past based on their cultural significance. 	<p>Cultural Heritage Housing strategy should ensure the conservation of historic areas of cultural significance</p>
28	SHEP No 2 <i>Scheduled Ancient Monuments</i>	<ul style="list-style-type: none"> • Sets out Scottish Ministers' policy for the identification and designation of nationally important ancient monuments, which range from 4000BC to World War Two defences in the 1940s. 	<p>Cultural Heritage Include a SEA objective that protects and enhances archaeological sites and other culturally important features.</p>
29	Reaching Higher (Scottish Executive 2007)	<ul style="list-style-type: none"> • It focuses on the promotion, delivery, playing and enjoyment of sport. Key to this is developing a culture where sport is valued for the pleasure and quality it brings to people's lives and for the pride and recognition it brings to our nation. 	<p>Population & Human Health The Strategy should promote the delivery, playing and enjoyment of sports</p>
30	Planning Policy for the Protection of Playing fields (Sportscotland 2007)	<ul style="list-style-type: none"> • It seeks to address development pressures on playing fields by setting out a policy framework for interaction between planners and sports managers like sportscotland so that playing fields can be protected and improved. 	<p>Population & Human Health The Strategy should address conflicts between development and recreation</p>

31	National Audit for Sports Facilities (Sportscotland 2007)	<ul style="list-style-type: none"> • Sets the framework and the need to audit sports facilities, establish the general condition of sports facilities, estimate where necessary the capital cost of bringing them up to an acceptable standard and to estimate the costs of maintaining them in an acceptable condition 	Population & Human Health The Strategy should be supported by proper audits
32	Performance review of Sports in Scotland (Sportscotland 2007)	It highlights <ul style="list-style-type: none"> • the need to encourage participation • the need for improved data to monitor and evaluate participation levels • the need for Scotland to take a nationwide approach to facility planning and investment • the need for Scottish Government to properly assess and manage the significant risks associated with the games 	Population & Human Health The Strategy should encourage participation, monitoring and evaluation
33	SPP1 - The Planning System	<ul style="list-style-type: none"> • Promotes sustainable economic Development in planning • Encourages and supports regeneration and social justice through the planning system • Maintaining and enhancing the quality of natural heritage and built environment 	All Issues Open Space Strategy should pursue sustainable economic development, regeneration and social justice
34	SPP 11 – Physical Activity and Open Space (draft)	<ul style="list-style-type: none"> • Ensures local authorities take a strategic approach to sport and open space provision; protects and enhances networks of open space; and supports opportunities for active and passive recreation; • Set standards for the quantity and quality of open space in new developments; provides for its long-term maintenance; and provides guidance on planning for development of new sports and recreation facilities. 	Population and Human health Open Space Strategy should promote physical activities

35	PAN 44 Fitting New Housing Development Into The Landscape.	<ul style="list-style-type: none"> • Provides advice to help planners, developers and local communities achieve residential developments which are in harmony with their landscape setting and which make a more positive contribution to the character of existing settlements. 	Landscape Open Space Strategy should promote good landscape designs
36	PAN 56: Planning and Noise	<ul style="list-style-type: none"> • Indicates how noise issues should be handled in development plans and development control. • Outlines ways of mitigating the adverse impact of noise. • Provides specific guidance on noisy and noise-sensitive development and introduces the use of noise exposure categories. • Gives guidance on the use of planning conditions relating to noise 	Population & human health Consider strategies that minimise noise in housing construction
37	PAN 58: Environmental Impact Assessment	<ul style="list-style-type: none"> • Seeks the provision of information and guidance on the legislative background to EIA, the process of environmental impact assessment, and the evaluation of environmental information by the planning authority and implementation through the planning decision. 	All Issues Open Space Strategy should contribute to environment protection
38	PAN 59: Improving Town Centres	<ul style="list-style-type: none"> • Promotes lively, vibrant and viable town centres that provide a quality urban environment where people can live, feel safe, businesses can prosper and opportunities exist for new stimulating activities • Ensure town centres are flexible and adaptable if they are to remain active and attractive; and are accessible by a variety of efficient and effective modes of transport, have an amenity which is attractive, clean and safe, and are planned, managed and promoted in a positive way 	All issues Open Space Strategy should contribute to sustainable economic development

39	PAN 60: Planning for Natural Heritage	<ul style="list-style-type: none"> • Provides advice on how development and the planning system can contribute to the conservation, enhancement, enjoyment and understanding of Scotland's natural environment. • Encourages developers and planning authorities to be positive and creative in addressing natural heritage issues 	<p>Cultural heritage, Landscape</p> <p>Open Space Strategy should contribute to the conservation, enhancement, enjoyment and understanding of the natural environment.</p>
40	PAN 61 Planning And Sustainable Urban Drainage Systems.	<ul style="list-style-type: none"> • Describes how the planning system has a central co-ordinating role in getting SUDS accepted as a normal part of the development process. In implementing SUDS on the ground, planners are central in the development control process, from pre-application discussions through to decisions, in bringing together the parties and guiding them to solutions which can make a significant contribution to sustainable development 	<p>Water & Soil</p> <p>Open Space Strategy should consider the role of sustainable urban drainage</p>
41	PAN 65: Planning and Open Space	<ul style="list-style-type: none"> • Raise the profile of open space as a planning issue • Provides advice on the role of the planning system in protecting and enhancing existing open spaces and providing high quality new spaces • Sets out how local authorities can prepare open space strategies and gives examples of good practice in providing, managing and maintaining open spaces 	<p>Landscape, human health</p> <p>Open Space Strategy should promote conservation and environment protection</p>
42	PAN 67 Housing Quality	<ul style="list-style-type: none"> • Sets out the aspirations for design and the role of the planning system in delivering them, and explains how Designing Places should be applied to new housing. • Makes the design of new housing to reflect a full understanding of its context - in terms of both its physical location and market conditions. It seeks to make the design of new housing to reinforce local 	<p>Cultural heritage, Population & human health</p> <p>Open Space Strategy should safeguard high standard of designs</p>

		and Scottish identity and that new housing should be integrated into the movement and settlement patterns of the wider area.	
43	PAN 68 Design Statements	<ul style="list-style-type: none"> • Clarifies the role of design statements and applicants, • Aims to see design statements used more effectively in the planning process and to create places of lasting quality. 	<p>Cultural heritage, Population & human health</p> <p>Open Space Strategy should safeguard high standard of designs</p>
44	PAN 69 Planning And Building Standards Advice On Flooding	<ul style="list-style-type: none"> • Ensures that future built development is not located in areas with a significant risk of flooding, including functional flood plains. • Provides background information on the impact of floodwater on buildings and materials, and advice on flood resistant materials and forms of construction that may be necessary to obtain a building warrant. Many of the measures described in the PAN will have a role to play as part of a sustainable approach to flood management. 	<p>Water & Soil</p> <p>Open Space Strategy should avoid and minimise the risk to flooding</p>
45	PAN 74: Affordable Housing	<ul style="list-style-type: none"> • Sets a benchmark for contributions for affordable housing from new planning applications. The benchmark for developer contribution for affordable housing has been set at 25% on sites of 20 units or more. • Recommends closer working between Local Authority Housing and Planning services to ensure the need for affordable housing is met. 	<p>Material Asset</p> <p>Open Space Strategy should make provision for affordable housing</p>

46	PAN 76 New Residential Streets	<ul style="list-style-type: none"> • Aims at creating attractive, safe residential environments, which reflect the needs of people, rather than cars. • Requires that street design should reflect local character, be appropriate to the built form and linked to surrounding areas by direct pedestrian, cycle and car routes; that the character of the street should be determined by space requirements of people and vehicles, street furniture should fit with its surroundings and streets should use high quality materials, be well maintained and may employ signage to reinforce its sense of place; and that streets should provide easy movement within and beyond the site, street design itself should be used to limit traffic speed and home zones, prioritising pedestrian and cycle needs over car users, should be considered for residential streets. 	<p>Cultural heritage, Population & human health</p> <p>Open Space Strategy should safeguard safe and high standard design of streets</p>
47	PAN 77 Designing Safer Places	<ul style="list-style-type: none"> • Highlights the positive role that planning can play in helping to create attractive, well-managed environments which help to discourage antisocial and criminal behaviour. • Aims to ensure that new development can be located and designed in a way that deters such behaviour as poorly designed surroundings can create feelings of hostility, anonymity and alienation and can have significant social, economic and environmental costs. 	<p>Cultural heritage, Population & human health</p> <p>Open Space Strategy should safeguard safety</p>
48	PAN 78 Inclusive Design	<ul style="list-style-type: none"> • Seeks to deliver high standards of design in development and redevelopment projects; and widens the user group that an environment is designed for. Makes is a legal requirement to consider the needs of disabled people under the terms of Disability Discrimination legislation. 	<p>Cultural heritage</p> <p>Open Space Strategy should promote high standard of design</p>

49	Land Reform (Scotland) Act 2003	<ul style="list-style-type: none"> The Act provides responsibilities for local authorities to create and maintain core path networks. 	Biodiversity, Landscape, Human Health Open Space Strategy should be consistent with core paths plan
50	Scotland's Sustainable Development Strategy, 2005	<ul style="list-style-type: none"> Has actions to continue to promote walking and cycling for sustainable transport and health benefits 	Human health Open Space Strategy should promote walking and cycling
51	Protection of Badgers Act 1992	<ul style="list-style-type: none"> Aimed at protection of badgers, and applicable to wide range of land users, and hence uses. Prohibits any damage to setts, and encouraging access to setts by dogs. 	Biodiversity Open Space Strategy should discourage any potential disturbance to badgers
52	Healthy Eating, Active Living: Action Plan to improve Diet, Increase Physical Activity and Tackling Obesity (June 2008)	<ul style="list-style-type: none"> Outlines scale and nature of issues in our communities, and recognizes role of physical environment in our physical and mental health. 	Population & human health Open space Strategy to highlight links between healthy communities and use of open space.
53	Health Impact Assessment of Greenspace – A Guide	<ul style="list-style-type: none"> Guide to advise how to assess health and equity impacts of greenspace, and promote greater recognition in role of greenspace in improving health. 	Human Health Open Space Strategy to be assessed through HIA.
54	UK Pesticides Strategy: A	<ul style="list-style-type: none"> Replaces Pesticides and Environment Strategy 	Human Health, Biodiversity

	Strategy for the Sustainable use of Plant Protection Products	<p>(DEFRA 2006), and extends it to cover human health issues arising from Pesticide use</p> <ul style="list-style-type: none"> • Includes aspects of pesticide in amenity landscape management, and covers health of people and the environment 	Open Space Strategy should include measures to minimise adverse impacts on human health and the environment arising from pesticide use
55	Building on Energy	<ul style="list-style-type: none"> • Sets out strategic priorities to achieve target growth rate across the NE, whilst acknowledging that quality of life is a key factor both in retaining the population, and attracting more people. Recreation and natural environment are recognized as key components of the quality of life, and the plan aims to improve its overall position as measured against other city regions, over the next 5 years. 	<p>Material Asset, Biodiversity, Population & Human Health</p> <p>Open Space Strategy to set out measures to protect and improve upon recreational and natural environment component of our communities,</p>
56	Joint Health Improvement Plan	<ul style="list-style-type: none"> • Seeks to encourage, support and enable individuals and communities to take shared responsibility for their own health and to work together to bring about improvements by enabling people to become involved in community issues; • Supports action to suppress poverty, lack of physical activity and leisure facilities, poor housing and other factors that contribute to physical inequality; 	<p>Population & human health</p> <p>Develop open space strategy that support health and well-being</p>
57	North East of Scotland Local Biodiversity Action Plan	<ul style="list-style-type: none"> • Ensures the protection and enhancement of the biodiversity in the north east through the development of effective, local, working partnerships; • Ensure that national targets for species and habitats, as specified in the UK Action Plan, are translated into effective local action; • . 	<p>Biodiversity, fauna & flora</p> <p>Open Space Strategy should promote biodiversity</p>
58	North East Scotland Together Aberdeen & Aberdeenshire Structure Plan 2001-2016	<ul style="list-style-type: none"> • Creates a long-term sustainable framework of settlements in a hierarchy, which focuses major development on the main settlements in the North East, 	<p>All Issues</p> <p>Open Space Strategy should promote sustainable development</p>

		<ul style="list-style-type: none"> • Sets the strategic context for Aberdeenshire Local Plan which in turn set the framework for land use housing development 	
	LOCAL		
59	Aberdeenshire Community Plan	<ul style="list-style-type: none"> • Stresses access to services of a high quality that meet their needs; seeks to make Aberdeenshire an attractive, clean, healthy and safe place to live; • Promotes Aberdeenshire as forward-looking 	All Issues Open Space Strategy should support accessibility, health, Safety, and the environment
60	Aberdeenshire Local Plan	<ul style="list-style-type: none"> • Sets the context and targets for land use, and the direction as well as the capacity of housing development in Aberdeenshire 	All Issues Open Space Strategy should be consistent with the local Open Space Strategy
61	Aberdeenshire Parks and Open Space Strategy 2006	<ul style="list-style-type: none"> • Sets the framework of the audit of open spaces, and proper development, management and improvement parks and open space 	Population and Human Health The Open space strategy should ensure proper management and improvement of facilities
62	Aberdeenshire Local Transport Strategy	<ul style="list-style-type: none"> • Makes the local transport strategy to take full account of the environment, social and economic implications of transport; • Promotes the maximisation of accessibility for all to services and jobs; efficient resource use, as well as safety in delivering transportation 	Material Asset, Air, Climatic factors Open Space Strategy should support social exclusion, sustainability, environment protection, accessibility and safety
63	Landscape Character Assessment of Aberdeen.	<ul style="list-style-type: none"> • Seeks to maintain a balance between landform, geology, ecology, and vegetation despite human influences. • Encourages development in existing settlements; avoiding coalescence between settlements and discouraging isolated development in the open countryside unless it is clearly identified in development plan 	Landscape Open Space Strategy should promote good landscape designs

64	Aberdeenshire Council Economic Development Priorities	<ul style="list-style-type: none"> Seeks to promote economic development in Aberdeenshire area based on renewable energy, integration of agricultural and fisheries sectors as well as having an input into employment land provisions 	<p>Material Asset</p> <p>The open space strategy should be consistent with economic development priorities</p>
65	Aberdeenshire Council Sustainability Charter 2004	<p>The Charter aims to:</p> <ul style="list-style-type: none"> reduce key resource usage (i.e. energy, water, travel, and waste); raise awareness; adopt a sustainable purchasing policy; reduce global footprint and encourage consultation 	<p>All</p> <p>Open Space Strategy should promote minimisation of resource use</p>
66	Aberdeenshire Council Carbon Management Programme 2007	<p>The programme seeks to achieve</p> <ul style="list-style-type: none"> Overall reduction in CO2 emissions of 20% by 2012 An aspirational target to reduce CO2 emissions by 30% by 2012 	<p>All</p> <p>Open Space Strategy should promote reduction in CO2 emissions</p>
67	Aberdeenshire Council's Core Paths Plan Draft	<ul style="list-style-type: none"> Prepared in accordance with requirements of Land Reform Act, Core Paths Plan aims to improve and connect path network in Aberdeenshire to give public reasonable access throughout the area. 	<p>Biodiversity, Population & Human Health</p> <p>Open Space Strategy should protect and promote access to core paths</p>
68	Aberdeenshire Council Pitches Strategy Draft 2008	<ul style="list-style-type: none"> Sets out the context for effective and efficient development, management and rationalisation of Aberdeenshire pitches 	<p>Biodiversity, Population and Human health</p> <p>The Open space strategy should promote efficiency and effectiveness</p>
69	Aberdeenshire Council Sports and Active Lifestyle Strategy 2005-2008	<ul style="list-style-type: none"> Maximise opportunities for people of all ages and abilities to participate in sport and physical recreation. Develop the infrastructure, which will allow athletes and participants in sport and active recreation to flourish. 	<p>Human Health and Population</p> <p>The implementation of the sports strategy should ensure broad participation, flourishing of participants, and</p>

		<ul style="list-style-type: none">• Build the capacity of communities to sustain sporting and recreational activities and new opportunities.• Raise the profile of sport and recreation and promote the contribution it makes to the quality of life in Aberdeenshire.	sustainability of facilities

Table 7.3.2: The main settlements likely to be affected by fluvial and coastal flooding (up to the 2080s)

SEA Topic	Quantified information		
Climatic Factors	Settlement	Flood risk	
		Fluvial flooding constraints (1 in 200 year flood event)	Tidal/coastal flooding constraints
	Significantly constrained		
	Fraserburgh	To the west and southeast , including part of the settlement and Fraserburgh Golf Course.	Harbour area (jetties only, not the buildings).
	Turriff	To the south , southwest and northwest from the river Deveron, Burn of Knockiemill, Burn of Dulerstone, and Burn of turriff.	N/A
	Longside	To the north , east , and southeast from the South Ugie Water and Burn of Cairngall.	N/A
	Huntly	To the north , from the River Deveron, which already affects part of the settlement, and to the east and southeast from the river Bogie and Thains Burn.	N/A
	Kintore	To the north , northeast and southeast from the Loch Burn, Bridgealehouse Burn, River Don, and Tuach Burn	N/A
	Banchory	To the south from the River Dee affecting part of the settlement immediately adjacent to the river, to the northeast and east from Burn of Bennie.	N/A
	Newtonhill	To the north and northwest from the Burn of Elrick and to the south from Pheppie Burn.	None.
	Moderately constrained		
	Peterhead	To the north and northwest from the River Ugie and Collie Burn, and to the south from a drainage ditch, which affects the Dales Industrial Estate and a works factory on South Road.	Harbour area, affecting buildings in South Bay Harbour, Bridge street, and the main piers.
	Inverurie	To the north and west from the River Urie, which includes part of the Inverurie Paper Mill, and to the south , from the river Don, which affects part of Port Elphinstone.	N/A

	Stonehaven	To the north and northeast from the Cowie Water (including Mineralwell Park) and to the south from Carron Water.	To the northeast encompassing all of Cowie, the caravan park, and the leisure area along Beach Road, and to the southeast including part of the harbour and the settlement (e.g. High Street)
	Bielside	To the south from the River Dee.	N/A
	Milltimber	To the south from the River Dee.	N/A
	Peterculter	To the south from the River Dee.	N/A
	Slightly constrained		
	Banff	To the south from the River Deveron, affecting Collenard Park and Dew Haugh.	To the southeast , affecting Duff Royal Golf Course, and part of the settlement to the east (including part of Bridge Street, Maple View, the football grounds and Princes Royal Park).
	Macduff	To the south , from Gelly Burn.	None.
	Mintlaw	To the west and south from South Ugie Water and the northwest (Pitfour Lake).	N/A
	Ellon	To the south from the River Ythan, and to the east , from a drainage ditch.	N/A
	Alford	To the north from the River Don and a drainage ditch in Baldyvin Wood.	N/A
	Laurencekirk	To the west and northwest from Luther Water and Ducat Water.	N/A
	Balmedie	To the northeast from Eigie Burn.	None.
	Potterton	To the south from Blackdog Burn.	N/A

Appendix 7.4 Summary of Environmental Problems from the Baseline Data.

Table 7.4.1: Significant environmental problems: air quality

SEA Topic	Significant environmental problems
Air	No significant effects near waste management facilities or quarries, but there is an issue of odour from sewerage works near development in Inverurie.

Table 7.4.2: Significant environmental problems: water quality

SEA Topic	Significant environmental problems
Water	A decline and mortalities in the number of species of international importance if water levels fall. (For example Salmon deaths in the river Dee during low flows in 2004)
	Need to reduce water abstraction by incorporating water efficient technologies into new development (e.g. industrial and domestic) in light of the predicted decrease in summer rainfall.
	A decrease in summer precipitation may lead to a decline in ground water levels in upland areas and reduce the likelihood of new development proposals in these areas.
	Future development may put a constraint on maintaining ground water and river levels.
	53.1km of water courses in the North East are classified as poor or seriously polluted as a result of poor chemistry and biology quality.
	A build-up of nitrates from diffuse pollution within the River Ythan catchment is adversely affecting species that live in the mud flats of the river mouth, which is an internationally designated natural heritage site.
	Peterhead Power Station is likely to be contributing to the poor water quality.
	In the Aberdeenshire the main cause of poor quality coastline is the result of sewage effluent being released untreated.
	Major impact both on the sand dune erosion, wildlife and the enjoyment of other beach users from motorised vehicles.

Table 7.4.3: Significant environmental problems: soil quality

SEA Topic	Significant environmental problems
Soil quality	There are 5,900 potentially contaminated sites recorded in Aberdeenshire These include several hundred high-risk sites such as landfill and gasworks.
	Contaminated land places financial and technological constraints on development. These constraints may dictate the type of development: the feasibility of remedial works may determine that a site is only suitable for industrial use; the cost of remedial works may determine that high-density housing is the only viable economic option.
	Contaminated land impacts the water environment, i.e. ground surface and coastal waters, and the wider environment including for instance local ecology.
	Potential loss of prime agricultural land from climate change – precautionary approach may need to be applied in certain areas (e.g. on prime agricultural land near flood plains, along the coast, and on land of the highest quality).

	Not enough sites for recycling or composting biodegradable municipal waste (large, medium or small scale) to help the local authorities achieve their recycling and landfill targets.
	Coastal erosion mostly where there are no rocks or coastal defences.
	Increase silting of rivers from fluvial flooding.
	Increase in soil erosion from wind and water, which is exacerbated by bad land use practices, such as locating tracks/access roads on steep/ upland ground.

Table 7.4.4: Significant environmental problems: biodiversity

SEA Topic	Significant environmental problems
Biodiversity	Native species and habitats are increasing, and the Aberdeenshire BAP is meeting the UK BAP targets, but UK priority species and habitats are still declining and require rigorous protection and enhancement.
	Implementation of the NE BAPs is the key issue to enhancing biodiversity.
	Threat of Alien Species effecting water quality and ecological status of the rivers. Native species and habitats are increasing, and the NE BAP is meeting the UK BAP targets, but UK priority species and habitats are still declining and require rigorous protection and enhancement.
	The significance and purpose of Special Areas of Conservation (SACs) mean that development in or adjacent to them, such as the River Dee SAC may cumulatively prevent the objectives of these designations being met, and may prevent new development being developed.
	Indirect impact of development on designated sites that are affecting their water table, and therefore the quality of wetland habitats.
	Impact from large-scale leisure and recreation uses.
	Increase of access to designated sites could be damaging to some sites.
	Indirect impacts of development on non-designated sites.
	Large-scale schemes around edge of towns are placing significant development pressure on unprotected open spaces.
	There is significant development pressure for new houses along the coast.
	Fragmented habitats/ open space networks/ wildlife corridors may affect less mobile species from migrating and/or adapting to climate change.
	Need to enhance and augment habitats to avoid their decline within settlements.
	Risk of increasing population near sensitive natural heritage areas.
	Extensive use of land, and cumulative impact is resulting in the loss of biodiversity.

Table 7.4.5: Significant environmental problems: climatic factors

SEA Topic	Significant environmental problems
Climatic factors	High energy dependence on fossil fuels to provide heat and electricity.
	High energy dependence on fossil fuels for transportation.
	Lack of appropriate locations identified for renewable energy technologies.
	The current layout of low density housing does not reduce energy use (e.g. reducing wind chill, maximising solar gain).

	Few properties incorporate in their design resilience to extreme climate and weather conditions.
	Materials with high CO ₂ levels are still increasingly popular (e.g. concrete and tarmac).
	Sea defensive walls may be inadequate as sea levels rise.
	Rise in soil erosion from storm events, which will create a greater need for SuDS, and an increase their water holding capacity.
	Rising precipitation and storms will increase fluvial flooding (e.g. 1 in 200 year flood event), which will restrict where new development can be located for some settlements.
	The number of properties at risk from inland fluvial flooding is low, but local flood defensive schemes will still be required.
	Rise in precipitation during the winter months and increase in storms will result in the need for SuDS to prevent pluvial flooding in urban areas.
	Aberdeen consumes more natural resources per person than any other Scottish city and has the largest global footprint in Scotland, which cannot be sustained in the long-term.
	Fragmented habitats resulting from development and changes in the climate may affect less mobile species from migrating and/or adapting to changes in the environment.
	Need to promote appropriate native species in new development schemes to enhance existing biodiversity and preventing the spread of non-native species.
	Increasing need for service provision throughout the year (e.g. as flood events are predicted to increase during winter seasons).

Table 7.4.6: Significant environmental problems: human health

SEA Topic	Significant environmental problems
Human health	Need for larger areas of open spaces, including civic or town parks.
	Poor access to services in rural areas.
	Centralisation of service provision has and will continue to affect marginalised areas.
	Pockets of deprivation through low job opportunities and income could be adversely affecting people's mental health in northern Aberdeenshire.
	There will still be a need for a significant proportion of new housing to be larger properties.
	.

Table 7.4.7: Significant environmental problems: population

SEA Topic	Significant environmental problems
Population	Increasing number of households is creating more demand for housing (and land).
	The need for more development land is placing pressure on or near sensitive natural heritage areas.
	The growing age of the head of the household may result in more homes needed for their needs (e.g. bungalows or special needs dwellings).
	Aging population will create demand for certain types of houses (e.g. bungalows and services (increasing the need for more land) and care homes.
	In-migration will create greater demand for houses and services in Aberdeenshire.
	Possible need for services catering for 'non-Scotland' migrants, especially if from overseas (e.g. language and cultural issues/differences).
	Retiral 'stealth' in-migration may affect housing and service provision in Aberdeenshire (i.e. an increase need for).

Table 7.4.8: Significant environmental problems: cultural heritage

SEA Topic	Significant environmental problems
Cultural heritage	Although only a small percentage of the listed buildings in the North East are on the Buildings at Risk Register, the area has one of the highest numbers of properties at risk.
	Only a small number of buildings at risk are undergoing restoration in the North East.
	The majority of the buildings at risk are in rural areas, with few undergoing restoration.
	Poorly designed buildings, especially for the disabled, elderly and children.
	Issue of conflicting requirements when ensuring the accessibility of existing buildings.
	Development adversely impacting on a community's or settlement's 'sense of place' (e.g. historical perspective).
	Safeguarding building functionality (e.g. use, access and space), which is not always considered.
	Poor design when incorporating modern materials.
	Cumulative impact of proposals, which alone may not affect the conservation designation, but cumulatively affect it's overall objective.
	Loss of unknown and locally known architectural remains from new development and other practices, vandalism and coastal erosion.
	Adverse impacts on the setting of listed buildings and archaeological remains from new developments.

Table 7.4.9 Significant environmental problems: landscape

SEA Topic	Significant environmental problems
Landscape	The insensitive siting and design, as well as type (e.g. dwelling(s), wind farm or quarry) of new development.
	The siting and design of new developments are individually and cumulatively adversely affecting designated landscapes.
	The individual or cumulative impact of dwelling houses may adversely be affecting the purpose of landscape designations, e.g. by affecting the coastal and landscape characteristics of Areas of Landscape Significance.
	The insensitive siting and design of new developments are individually and cumulatively adversely affecting: <ul style="list-style-type: none"> ○ the setting of settlements; and ○ townscapes (e.g. conservation areas).
	There is an increased need to: <ul style="list-style-type: none"> ○ assess a settlement's key features(s); ○ reinforcing a sense of place; and ○ involving local communities.
	The inappropriate scale and insensitive siting of enabling development is adversely affecting landscape characteristics (e.g. changing it's landscape character type, not respecting local topography/contours).
	New development not fitting in with the landscape's capacity to absorb further developments (e.g. design, layout and sense of place) – need to promote suitable development capacity.

Table 7.4.10: Significant environmental problems: material assets

SEA Topic	Significant environmental problems
Material assets	
	More than half of the housing stock in the Aberdeenshire is failing to meet the Scottish Housing Quality Standard.
	More retrofitting of dwellings is required to bring them back into habitable use.
	Works have been identified in the Aberdeenshire to ensure that properties are safeguarded from flooding.
	Need to ensure that: <ul style="list-style-type: none"> ○ new development will not increase the probability of flooding elsewhere; ○ development is not sited in an area at risk from fluvial or coastal flooding; and ○ existing and new urban drainage systems will not flood properties (especially as storm events are predicted to increase).
	Predicted rise in sea level may result in existing flood defences being inadequate.
	The predicted rise in storm events and winter precipitation is likely to increase soil/sand erosion from the wind and rain/water, which may prevent existing flood defence schemes functioning properly and result in their failure (e.g. collapse).
	There is a significant wastewater constraint issue in most of Aberdeenshire.
	There is a significant water supply constraint throughout most of the North East, with the exception of a handful of settlements.
	There is a significant shortfall of affordable housing in Aberdeenshire, especially in one bedroom and 4 plus bedroom dwellings.
	The lack of holiday/second homes will increase house prices as dwellings that would normally have been bought to live in are bought for the purpose of being a used as a second/ holiday home.
A shortage of holiday/second homes will adversely affect the tourist trade in Aberdeenshire's most popular areas.	
Very few new developments (e.g. dwellings, schools, offices etc) are using sustainable materials in the Aberdeenshire.
