Enquiry Text

Dear Aberdeenshire Council,

I write I respect to the addendum to the main issues report. The proposals out lined in the addendum with respect to the planning and development of wind turbines is unacceptable. The responses and general concerns about wind turbine development was evident from the number of responses and issues raised by respondents to the Main Issues Report.

Further consideration must be given to the strategy and planning considerations of wind turbines and their impact on both the environment and the quality of lives of those in close and far proximity. While I am a supporter of wind turbine energy In principle I do not want to see the beautiful countryside of Aberdeenshire and in particular areas such as the Bennachie range blighted by their erection which seems to be on a random basis with not enough regard for individual placement or cumulative effect.

Further work on this is essential and must be carried out quickly. It would be good to see a national plan for Scotland with wind turbines farms erected in areas of least impact with significant benefits offered to the communities in which they are situated.
