1.0 Introduction

- 1.1.1 The Conservation (Natural Habitats, &c.) Regulations 1994, as amended, requires local development plans (LDP) and associated supplementary guidance (SG) to be the subject of a Habitats Regulations Appraisal (HRA).
- 1.1.2 This Habitat Regulations Appraisal (HRA) statement has been prepared in conjunction with the Main Issues Report (MIR) for the Aberdeenshire Local Development Plan 2021. Habitat Regulations Appraisal is a requirement of Article 6(3) of the Habitats Directive, which have been transposed into The Conservation (Natural Habitats, &c.) Regulations 1994 (as amended). The appropriate time to publish a record of HRA in support of local development plans is at the same time as publishing the Proposed Plan, Proposed Action Programme and revised Environmental Report. However, at the Main Issues Report stage it is important to consider the implications of preferred options for nature conservation sites protected by European legislation.
- 1.1.3 The LDP can only be adopted if it can be ascertained that the plan will not adversely affect the integrity of a European Site. The Council, as 'the competent authority', can only agree to the Plan after having ascertained that it will not adversely affect the integrity of any European site, both within and outside the area of the Plan.
- 1.1.4 This HRA follows the staged appraisal process set out in SNH's Habitats Regulations Appraisal of Plans - Guidance for Plan-Making Bodies in Scotland v. 3.0 January 2015. This facilitates the systematic assessment of the potential effects of the Main Issues Report of Aberdeenshire Council's policies and proposals (primarily site allocations). This is the first stage of the Habitat Regulations Appraisal, Supplementary Guidance on the 'European Sites' shall be assessed at the proposed local development plan stage. Where it is not possible to rule out the risk of 'significant effects' then the relevant aspects of the Proposed Aberdeenshire Local Development Plan (PALDP) will require an "appropriate assessment". This shall be assessed at the proposed plan stage.

Background to Habitats Regulations Appraisal (HRA)

- 1.2.1 European sites comprise of:-
- i) Special Areas of Conservation (SAC) and candidate Special Areas of Conservation (cSAC) designated under the European Commission's Habitats

Directive, which seeks to ensure the conservation of a wide range of rare, threatened or endemic animal and plant species. Some 200 rare and characteristic habitat types are also targeted for conservation in their own right.

ii) Special Protection Areas (SPA) and proposed Special Protection Area (pSPA) classified under the European Commission's Birds Directive, which aims to protect all of the 500 wild bird species naturally occurring in the European Union. Habitat loss and degradation are the most serious threats to the conservation of wild birds. The Directive therefore places great emphasis on the protection of habitats for endangered and migratory species and establishes a network of Special Protection Areas (SPAs) including all the most suitable territories for these species.

- 1.2.2 To enable the long-term survival of Europe's most valuable and threatened species and habitats SAC's and SPA's also form a coherent European Union wide ecological network known as 'Natura 2000'.
- 1.2.3 Under Article 6 (3 & 4) of the European Habitats' Directive any plan or project likely to have a significant effect on a Natura 2000 site, either individually or in combination with other plans or projects, must undergo an Appropriate Assessment to determine its implications for the Nature Conservation site. The competent authority can only agree to the plan or project after having ascertained that it will not adversely affect the integrity of the site concerned (Article 6.3). In exceptional circumstances, a plan may still be allowed to go ahead, in spite of a negative assessment, provided there are no alternative solutions and the plan or project is considered to be of overriding public interest. In such cases the Member State must take appropriate compensatory measures to ensure that the overall coherence of the Natura 2000 Network is protected (Article 6.4).
- 1.2.4 In Scotland, as of August 2012, a total of 393 European sites have been designated. These comprise a total of 240 SACs and 153 SPAs, accounting for approximately 15% of Scotland's land surface.
- 1.2.5 This paper should be read along with the Strategic Environmental Assessment (SEA) as part of the Aberdeenshire Main Issues Report and Draft Proposed Aberdeenshire Local Development Plan.

2.0 The Appraisal (Stages 1-4)

2.1 This Appraisal follows the staged approach for the Habitats Regulations for Plans, as set out in the flow chart in the 2015 guidance (see Appendix 1).

Stage 1 - Should the plan be the subject of an HRA?

2.2 Under the Part IVA (regulation 85A – 85E) of the Conservation (Natural Habitats, &c.) Regulations 1994 as amended, it is a statutory requirement to appraise ‘local development plans’ and ‘supplementary guidance’ for likelihood of having significant effects on European sites.

2.3 The Scottish Ministers strongly advises a plan-making body or authority located in Scotland to undertake an appropriate assessment of a plan in a manner which the Ministers may prescribe, regardless whether or not the plan complies with the Habitats Directive and Regulations.

Stages 2 and 3 - Site Selection and Information Gathering

2.4 The identified sites were selected on the basis of advice set out in pages 13-14 of the 2015 Guidance. The site selection process has been carried out by the author of this appraisal, an experienced planning officer in the competent authority. Consultation and advice was sought from a qualified environmental officer, also employed in the competent authority.

2.4 There are two steps to the selection process. Firstly European sites in, straddling or having potential connectivity with the sites and within plan area were identified, as detailed in Appendix 2, Table 1. Appendix 2, Table 2, then summarises the relevant European sites, along with their conservation objectives and identifies their qualifying interests and conditions of the sites, followed by factors that influence the sites and their vulnerability to changes. Background information such as site specific research reports and management guidance were also noted where necessary.

2.5 The conservation objective for all sites are to ensure that the qualifying species are maintained in the long term. The following method has been used for all sites (unless indicated in the “conservation objectives” column):

- Population of the species as a viable component of the site
- Extent of the habitat on site
- Distribution of the habitat within site
- Structure, function, and supporting processes of habitats supporting the species
- Processes supporting the habitat

- No significant disturbance of the species

- 2.6 The tables in Appendix 2 above outline the list of Special Area Conservation, Special Protection Areas and RAMSAR sites that might be impacted on by the Aberdeenshire Local Development Plan 2021. The identified sites are primarily set within the ALDP area, however, some overlap with the Cairngorm National Park Authority area. It has been identified that a minor number of qualifying sites may be impacted upon due to connectivity with another qualifying site found within the plan area, in such instances, the qualifying sites set outside the plan area have been included.
- 2.7 Little or no consideration has been made of recreational effects of individual site allocations because, except under particular circumstances, these matters have been covered by the Habitats Regulations Assessment of the Strategic Development Plan and the overall scope of impacts (particularly on water abstraction from the River Dee) has been assessed in that parent document.

Conclusion of Analysis

- 2.8 In light of the analysis the following European sites have been identified as likely to be affected by policies and proposals in the proposed Aberdeenshire Local Development Plan, they are:

- | | |
|--|-----------------------------|
| • Troup, Pennan and Lion's Heads SPA | • Sands of Forvie SAC |
| • Red Moss of Netherley SAC | • Red Moss of Netherley SAC |
| • Ythan Estuary, Sands of Forvie and Meikle Loch SPA | • Muir of Dinnet SAC |
| • Buchan Ness to Collieston SAC | • Turclossie Moss SAC |
| • Buchan Ness to Collieston SPA | • Loch of Strathbeg SPA |
| • Cairngorms Massif SPA | • Fowlsheugh SPA |
| • Hill of Towanreef SAC | • Reidside Moss SAC |
| • Garron Point SAC | • Mortlach Moss SAC |
| • River Dee SAC | |

Stage 4 Discretionary Consultation on Method and Scope

2.9 In August 2018, informal communications took place between officers of Aberdeenshire Council and the Scottish Natural Heritage (SNH) regarding the method and scope of the Appraisal. The findings from this interim document shall be presented to the SNH, which is expected to entail further in-depth discussions with SNH. Furthermore, guidance has been sought from Environmental Planners of the Aberdeenshire Council for stage 5 of the appraisal.

3.0 The Appraisal – Stage 5 Screening the proposed Aberdeenshire Local Development Plan

3.1 Stage 5 involves screening the proposed plan and proposals for likely significant effects. The 2015 Guidance identifies 3 distinct purposes to this process:-

- a) Identify all aspects of the plan which would have no effect on a European site, so that they can be eliminated from further consideration.
 - This has been carried out in Appendix 3 and 4 whereby all proposed sites and policies have been screened.
- b) Identify all aspects of the plan which would not be likely to have a significant effect on a European site (i.e. would have some effect, because of links/connectivity, but which are minor or residual), either alone or in combination with other aspects of the same plan or other plans or projects, which therefore do not require ‘appropriate assessment’.
 - This has been carried out in Appendix 3 and 4. All sites that have been screened in stage (a) have been revisited. Initial scoping has been carried out to remove further sites from further screening.
- c) Identify those aspects of the plan where it is not possible to rule out the risk of significant effects on a European site, either alone or in combination with other plans or projects. This provides a clear scope for the parts of the plan that will require appropriate assessment.
 - This shall be carried out prior to drafting the “Proposed Local Development Plan 2021”. The policies and sites cannot be finalised until the consultation of the preferred sites are undertaken with various stakeholders and public and the outcome may alter any policy and/or sites which would make further works unviable.

3.2 As with the selection of potentially affected European sites, the screening process has been carried out with the advice of a qualified biodiversity officer. The appraisal been carried out using the 'likelihood test' detailed in paragraphs 4.3 to 4.6 of the 2015 Guidance.

3.3 The screening process has three key steps, as set out in paragraphs 4.7 to 4.29 in the 2015 Guidance. There are three steps in “screening”:-

Stage 5: Screening step 1 - General policy statements

Stage 5: Screening step 2 - Projects referred to in, but not proposed by, the plan

Stage 5: Screening step 3 - No likely significant effects on any European site, because:-

- a) The proposal is intended to protect the natural environment, including biodiversity, or to conserve or enhance the natural, built or historic environment, where enhancement measures will not be likely to have any negative effect on a European site;
- b) The proposals will not, themselves, lead to development or other change;
- c) The proposals are made which will have no conceivable effect;
- d) The proposals are made which will have no significant effect on a European site (and hence is a minor residual effect);
- e) Effects on any particular European site cannot be identified, because the policy is too general

3.4 Appendix 3, Table 3 and Table 4 below presents the record of this stage of the appraisal process. Firstly all the proposals have been assessed or screened. This is followed by assessment of the sites that have been “screened in” and proposed for inclusion in the “Proposed Aberdeenshire Local Development Plan” (PALDP). Mitigation measures that can be undertaken to eliminate the significant effects are noted resulting in the sites being screened out. “Appropriate assessment” of sites is not carried out at this stage of the appraisal and will be carried out at the proposed plan stage. Each policy has been assessed against the above screening criteria, to determine those parts of the plan that may then require to be the subject of an appropriate assessment. Where required further commentary is included in the tables. No Supplementary Guidance have been produced at this stage for assessment and this is likely to be assessed at PALDP stage.

4.0 Screening of Policies for Likely Significant Effects

The Following policies have been identified as “screened in” to the Habitats Regulations appraisal:

Policy B1 Employment and business land

Policy B3 Tourist facilities

Policy B4 Special development areas

Policy R1 Special rural areas

Policy R3 Minerals and hill tracks

Policy H1 Housing land

Policy HE3 Helping to reuse listed buildings at risk

Policy C2 Renewable energy

Policy RD1 Providing suitable services

The analysis associated with each of these policies is contained within appendix 4.

Each of these is subject to Policy E1 Natural heritage which specifically prohibits development which may have an impact on European sites, or the species that make use of them. Consequently, no impact could be expected from almost all of them. The policy may positively plan for the type of development proposed, but there are other checks and balances in the plan that mean they will have no effect on European sites.

Exceptions to this could arise from Policy RD1 Providing suitable services where Aberdeenshire Council is dependent on the operational needs of other authorities, whom are also obliged to have cognisance of the Habitats Regulations. It would be inappropriate for this plan to assess their effects.

5.0 Stage 6: Applying mitigation measures at screening stage to avoid likely significant effects

- 5.1 According to HRA Guidance, paragraphs 4.44 and 4.45 outlines the simple mitigation measures that can be adopted to overcome significant effects that can arise from a policy or project. If any site cannot be mitigated at this stage, then the proposal or policy must be rescreened and assessed for the need for appropriate assessment. Any policies that have already been screened in shall not be assessed for Stage 6 application of mitigation and shall be screened at proposed plan stage.

- 5.2 The table 5.1 below includes the sites/proposals (from Appendixes 3 and 4) that have been 'screened in' and also preferred sites that would likely to be taken forward in to the next plan. Mitigation measures have been proposed for any sites that are effectively 'screened in' and a further scoping has been carried out. The sites that have not been scoped out shall be assessed further using the guidance from Scottish Natural Heritage after the proposed plan has been agreed by Aberdeenshire Council, and prior to the production of the final plan.

- 5.3 The sites below may not be the final selections. However, any new site that is added in the future date shall be subject to the same assessment before any required 'appropriate assessment' is carried out.

Table 5.1 Sites selected for further screening/scoping

	BID Ref	Site Name	Settlement	Housing Units	Other develop-ments	Screening reference and comments	Second Check on Screening	Mitigation	Final Scoping	Reason for Scoping In
BUCHAN										
1	BU014	Aulton Road	Cruden Bay	41		Buchan Ness to Collieston Coast SAC and Buchan Ness to Collieston SPA is set to the south east. IN	Planning controls on construction and operation put in place	IN	Will require consideration of impacts on grazing geese with reference to the SPA

11	FR090	OP1 Cromleybank	Ellon	980	Primary School, Employment Land	Ythan Estuary, Sands of Forvie and Meikle Loch SPA is set to the south east. This site is at a very close proximity to the qualifying sites and is likely to have an impact on the qualifying species through foul water drainage and impact on goose grazing areas.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the SPA site. Will require consideration of impacts on grazing geese with reference to the SPA
12	FR092	Site at Cassiegills	Ellon	150		Ythan Estuary, Sands of Forvie and Meikle Loch SPA is set to the south east. This site is at a very close proximity to the qualifying sites and likely to have an impact on the qualifying species through foul water drainage and impact on goose grazing areas..	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Will require consideration of impacts on grazing geese with reference to the SPA

13	FR093	Site at Former Smithy, Main Street	Newburgh	1		Ythan Estuary, Sands of Forvie and Meikle Loch SPA and Sands of Forvie SAC are set to the east. This site is at a very close proximity to the qualifying sites and likely to have an impact on disturbing the qualifying species.	OUT The site is too small to affect any qualifying sites			
14	FR116	Land at Blairton, Balmedie		1650 Reserve site		Ythan Estuary, Sands of Forvie and Meikle Loch SPA and Sands of Forvie SAC are set to the north east. The site is at a relatively close proximity to the qualifying sites and would have an effect indirectly through impact on goose grazing areas	IN	Planning controls on construction and operation	IN	Will require consideration of impacts on grazing geese with reference to the SPA
GARIOCH										
1	GR094	Land North of Dunecht, West of B977, Dunecht	Dunecht	50		The site is not close to Loch of Skene SPA, however, the qualifying site might be affected through indirect waste water drainage, impact	IN	Planning controls on construction and operation	IN	Appropriate drainage provisions will need to demonstrate that there will be no impact

						on goose grazing and visits from residents.				on the SPA site. Will require consideration of impacts on grazing geese with reference to the SPA
KINCARDINE and MEARNES										
1	KN040	Land at Polston Road, Maryculter	Kirkton of Maryculter	5		River Dee SAC is set to the east. This site is at a very close proximity to the qualifying site and may have an impact on the qualifying species through foul water drainage to the site.	OUT The site is too small to have any effect on qualifying sites			
2	KN055	Land at site OP1, Chapelton	Chapelton	4000	Commercial, Retail, Care home, Leisure and Community Facilities	Red Moss of Netherley SAC is set to the west. This site is at a very close proximity to the qualifying site and there is a likely to have an impact on the qualifying species through tourism/visits by residents.	OUT. Recreation opportunities highly limited on site. No significant increase expected. Standard planning controls will be in			

							place for environmental protection.			
3	KN074	Site OP1 (Phase 2), North West of Clune Gardens, Woodland of Durris	Woodlands of Durris	50		River Dee SAC is set to the northwest and west. The site is at a close proximity to the qualifying site and the qualifying features are likely to be affected through tourism/visits by residents and foul water drainage to the site.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there will be no impact on the River Dee SAC.
4	KN087	Site OP3, Blue Lodge, Ury Estate, Stonehaven	Stonehaven	99		The site may have an impact on Narrow-mouthed whorl snails Garron Point SAC due to tourism or walking.	OUT Significant increase in recreation thought to be unlikely due to the inaccessibility of the site. Unlikely to impact on qualifying species.			
5	KN102	Land at East Lodge (Bid 1), Ury	Stonehaven	212		Garron Point SAC is set to the east. This site is at a very close	OUT Significant increase in			

		Estate, Stonehaven				proximity to the qualifying site and likely to have an impact on Narrow-mouthed whorl snails. This is likely to be caused by tourism/visits.	recreation thought to be unlikely due to the inaccessibility of the site. Unlikely to impact on qualifying species.

8	KN110	Land at Blairs College Estate	Blairs	325	Golf course, equestrian centre, hotel and holiday accommodation	River Dee SAC is set directly to the north. The site is at a very close proximity to the qualifying site and the qualifying features are likely to be affected through tourism/visits by residents and foul water drainage from the site.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate no impact on the River Dee SAC
9	KN128	Land South of Deevie Gardens, Drumoak	Drumoak	49		River Dee SAC is set to the south east. The site is set at a very close proximity to the qualifying site and has a likely to disturb the qualifying features through tourism/visits by residents and foul water drainage.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA. Increase in disturbance unlikely.	IN	Appropriate drainage provisions will need to demonstrate no impact on the River Dee SAC
10	KN129	Land at Durris Forest, East	Durris Forest		Sports/Adventure Centre	River Dee SAC is set to the east. The site is set at a close proximity	OUT The site is to be			

		of Darnford, Durris				to the qualifying site and has a likely to disturb the qualifying features through tourism/visits.	managed as an upland tourism area and is unlikely to add considerable constraint to riverside access.			
MARR										
1	MR008	Site to East of Finzean Village Hall, Finzean	Finzean	8		River Dee SAC is set to the south-east. This site is at a very close proximity to the qualifying site and may have an impact on the qualifying species through foul water drainage.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the River Dee SAC
2	MR014	Land at Site C, Hill of Banchory East, Banchory	Banchory		Retail park (class 1)	River Dee SAC is set to the south. This site is at a very close proximity to the qualifying site and likely to have an impact on the qualifying species	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the

						through foul water drainage.				River Dee SAC
3	MR019	A93-Pitmurchie Road, Kincardine O'Neil - Delivery Option 3	Kincardine O'Neil	84		River Dee SAC is set to the south. The qualifying sites might be affected through indirect foul water drainage.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the River Dee SAC
4	MR020	Land North of LDP Site M1, Aboyne North West	Aboyne	200		River Dee SAC is set to the south. This site is at a very close proximity to the qualifying site and may have an impact on the qualifying species through foul water drainage.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the River Dee SAC
5	MR021	Cook School/Passing Trade Site, Kincardine O'Neil	Kincardine O'Neil		Retail/Café/Services	River Dee SAC is set to the south. The qualifying sites might be affected through indirect foul water drainage.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there will be no impact on the River Dee SAC

6	MR024	Land at Banchory GP & NHS Clinic, Bellfield, Banchory	Banchory		Royal Deeside Visitor Centre and Heritage Hub	River Dee SAC is set to the south. This site is at a very close proximity to the qualifying site and may have an impact on the qualifying species through foul water drainage and tourism.	IN	Any new development will require to have appropriate foul and storm water drainage verified by the Planning Authority and SEPA.	IN	Appropriate drainage provisions will need to demonstrate that there shall be no impact on the River Dee SAC
7	MR034	Phase 1, Land South of Beltie Road, Torphins	Torphins	29		River Dee SAC is set to the south. The qualifying sites might be affected through indirect and foul water drainage. 5.4 Cumulative effects on some Natura Sites between different aspects of the plan

Cumulative impacts may occur on the Loch of Strathbeg SAC and the Ythan Estuary, Sands of Forvie and Meikle Loch SPA and River Dee SAC from the development of a number of sites. The land take required for new development sites which may impact on

the Loch of Strathbeg is cumulatively very small for the whole area available for goose grazing and this is discounted. Large land allocations in the area around Balmedie may have a material impact on Goose grazing areas. Cumulative impacts from Foul water drainage within the River Dee catchment may have an impact on water quality within the River Dee SAC. Both of these final issues will be subjected to further assessments.

5.5 Conclusion

The initial scoping on all relevant sites have revealed that a number of sites in the LDP area may be subject to appropriate assessment. These sites are likely to have negative impact on Ythan Estuary, Sands of Forvie and Meikle Loch SPA, Loch of Strathbeg SAC, Sands of Forvie SAC, and River Dee SAC and therefore, subject to further assessment.

6.0 The Appraisal In-combination effects with other plans and projects

6.1 Paragraph 4.36 of the 2015 HRA Guidance advises that we must consider the cumulative effects on the LDP 2021 on neighbouring authorities and any proposal that have an impact on neighbouring qualifying sites. This in-combination test is, for example, relevant to aspects of the PALDP which would have some potential effect on a site. The effect alone would not be likely to be significant, but there are other plans or projects that would add to these effects, either by making them more likely, or more significant, or both.

6.2 In relation to the selected sites Local Development Plans from relevant adjoining authorities have been assessed to determine the scale of development proposed and the likelihood of significant effects, as set out in their HRA records, as follows:-

- River Dee SAC – Upstream sector and catchments or tributaries lies within Cairngorm National Park and downstream sector and its lower valley lies within the Aberdeen City plan area.
- Cairngorm Massif SPA - Component habitats, catchment and foraging areas potentially affected by proposals in the Cairngorm National Park Plan.
- Glen Tanar SAC - Component habitats, catchment and foraging areas potentially affected by proposals in the Cairngorm National Park Plan.
- Muir of Dinnet SAC - Component habitats, catchment and foraging areas potentially affected by proposals in the Cairngorm National Park Plan.
- Moray Firth SPA – Component habitats and foraging areas potentially affected by proposals in the North Sea, which may or may not be connected to land.

6.3 These plans also identify significant development and infrastructure projects within their own plan area and where appropriate these have been the subject of an appropriate assessment in the Habitat Regulations Appraisal of the relevant plan. No impacts have been identified on Natura sites from any of these proposals.

Aberdeen City Council

6.4 The Local Development Plan for Aberdeen City Council was adopted in 2017. Its Vision is based around economic growth throughout the city and achieving high quality environment and life. The plan provides a land use framework within which the authority shall work towards.

- 6.5 The HRA was published in October 2014. The screening process has identified that there remains a risk of significant adverse effects on the integrity of the River Dee SAC and Moray Firth SAC for their qualifying features, either alone or in combination with other plans and projects, should these proposals proceed. It also highlighted that there may be a potential effects from 4 policies (delivering mixed use community, land release policy and transportation policies) and an appropriate assessment was required. It also identified 32 proposals that may have a potential effect alone on a European site and 51 proposals having potential in-combination effects (River Dee SAC and Moray Firth SPA). An appropriate assessment was undertaken, highlighting the implications for the European sites and the mitigation measures that would be applied. The appropriate assessment concluded that no further mitigation was required and the site integrity would be protected for all European sites within the plan area.

Cairngorm National Park

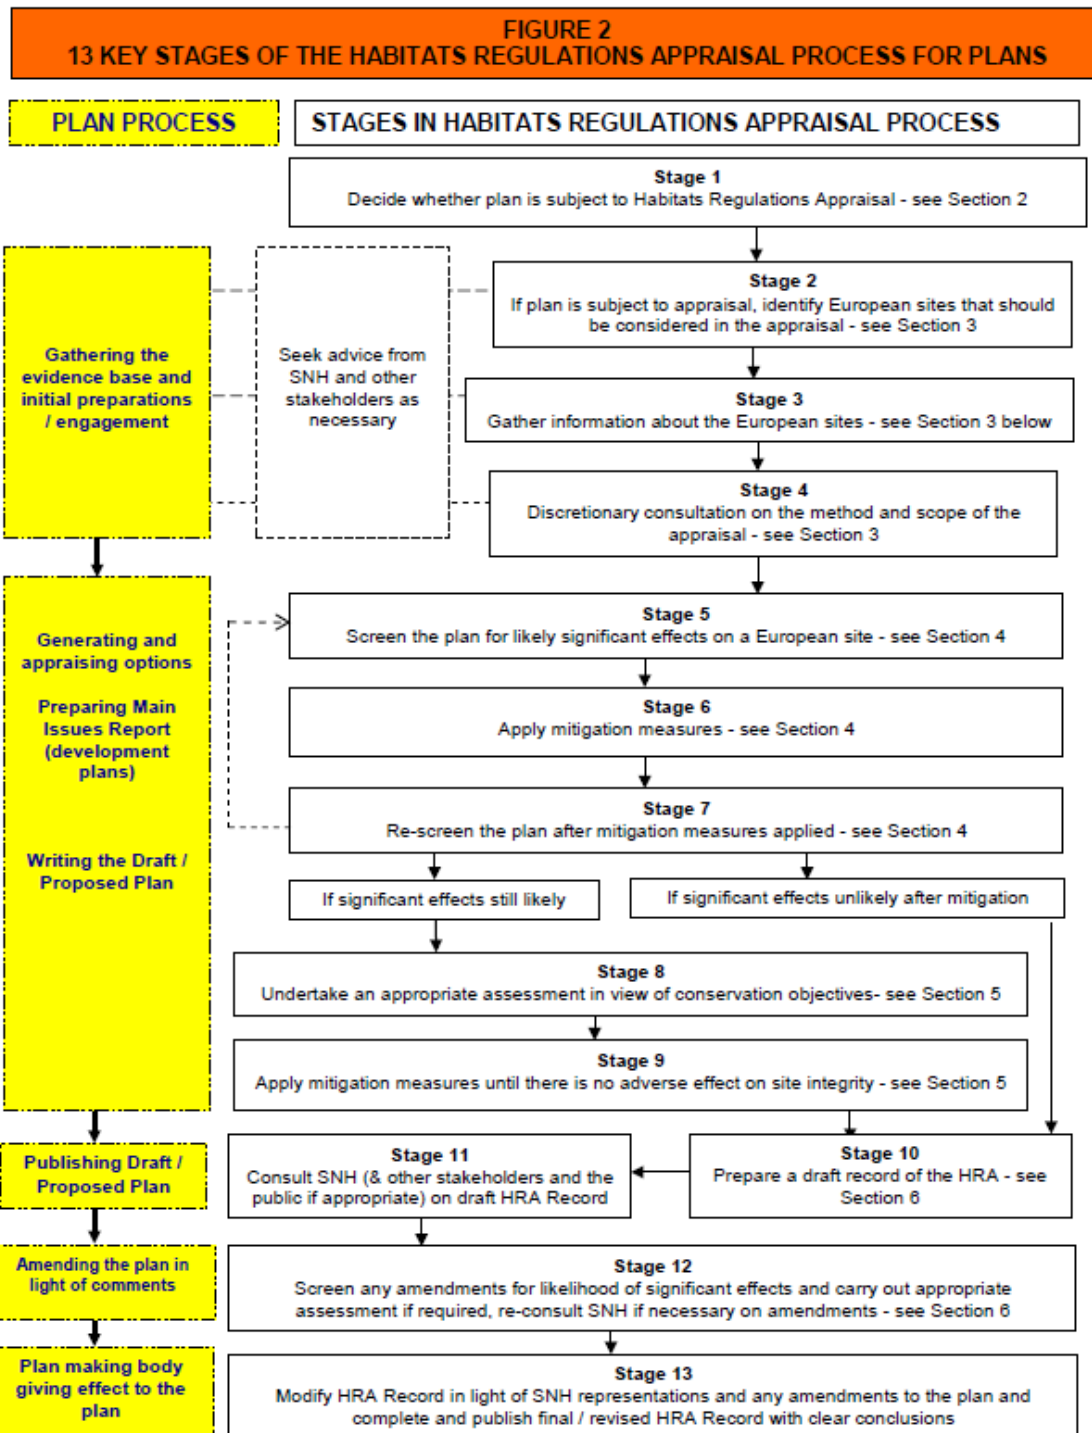

- 6.6 The Cairngorms National Park Local Development Plan was adopted by the CNPA on 27 March 2015. Its vision is founded on a sustainable economy where businesses thrives and a enhancing the natural and cultural heritage. The Plan provides policy priorities and programmes of work to deliver the vision and long term outcomes. 50% of the plan area is designated as European Site.
- 6.7 The HRA was published in April 2017 and it was concluded that “there were no Minor Residual Effects identified within the long term objectives, priorities, or policies, therefore there are no in-combination effects”. Only 4 policies were identified to have significant effects on the European Sites, however, they were eliminated by proposing appropriate mitigation measures.
- 6.8 The SPA and SAC sites that shares their boundary with the Aberdeenshire Council Plan Area are Cairngorm Massif SPA, Glen Tanar SAC and Muir of Dunnet SAC and no negative effect would result from the Cairngorm National Park Plan.

7.0 Conclusion

- 7.1 The primary objective of the European Union's Birds and Habitats Directives is to conserve Europe's most endangered and valuable habitats and species across their entire natural range. They also mark the EU's contribution towards averting global biodiversity loss.
- 7.2 The primary purpose of this HRA is to facilitate the systematic assessment of the potential effects of the Aberdeenshire Main Issues Report to establish the potential effects of the policies and proposals (primarily site allocations), to determine the likelihood of 'significant effects' on relevant opportunity sites. The staged appraisal process set out in SNH's Habitats Regulations Appraisal of Plans - Guidance for Plan-Making Bodies in Scotland Version 3.0 January 2015 (the 2015 Guidance) has been followed.
- 7.3 Stages 1 to 5 have been followed for the screening assessments of the policies and Stages 1 to 6 have been implemented for proposals (site allocations). The first screening exercise involved screening every opportunity site and policies and screening in and out to establish the effected sites. This would enable to prevent further screening should the preferred site allocations changes at the proposed plan stage. The second screening exercise undertaken on the opportunity sites recommended for inclusion in the Main Issues Report has identified that there remains a risk of significant adverse effects on any development at a close proximity to Sands of Forvie SAC and Ythan Estuary, Sands of Forvie and Meikle Loch SPA, Loch of Strathbeg SPA and River Dee SAC for their qualifying features.
- 7.4 Further assessment, in particular further scoping and appropriate assessment shall be carried out on policies and opportunity sites that are likely to have significant effects at the proposed plan stage, which is estimated to be in 2019. This initial Habitat Regulations Appraisal shall act as a stepping stone for the final HRA, which shall provide the base and detailed information to carry out further assessments. At this current stage, it cannot concluded whether the proposed would or would not have requires to be the subject of an appropriate assessment.

Table 3: Screening of Proposals for Likely Significant Effects

Housing Sites and ancillary development in Banff & Buchan

BID Ref	Site Name	Settlement	Housing Units	Other associated developments	Screening reference and comments	Screen in/Screen Out	Preferred/ Not preferred /Reserved
BB001	OP1 and P3	Cornhill	18	Primary School	Provision of change with no or minimal effects	OUT	Preferred for 12 homes
BB002	Land to the North of Memsie	Memsie	40		Provision of change with no or minimal effects	OUT	Not Preferred
BB003	Land to the North of Memsie (Phase 1)	Memsie	20		Provision of change with no or minimal effects	OUT	Not Preferred
BB006	Land at Hawthorn Cottages	Crudie	10		Provision of change with no or minimal effects	OUT	Preferred
BB007	Site OP1 Land at Golden Knowes	Banff	400	Community facilities, leisure and retail units	Provision of change with no link or pathway to qualifying features See OP1 Banff	OUT	Preferred
BB008	Site South West of Castlehill Drive	Gardenstown	7		The existing public sewerage system has capacity to connect the proposed development and on this basis, appropriate assessment is not required. However, should this change, the decision shall alter accordingly.	OUT	Not Preferred due to adverse visual landscape impact

BB009	Land off A981, Adjacent to Berryhill House	Memsie	15		Provision of change with no or minimal effects	OUT	Preferred
BB010	Site OP1, Crossroads	Memsie	15		Provision of change with no or minimal effects See OP1 Memsie	OUT	Preferred
BB011	P3 School Site	Memsie	Unkno wn		Provision of change with no or minimal effects	OUT	Not Preferred
BB014	Site Adjacent to Urquhart Road	Crudie	10		Provision of change with no or minimal effects	OUT	Not Preferred
BB015	Land South of Cairnmuir Farm	Memsie	60		Provision of change with no or minimal effects	OUT	Not Preferred
BB016	Land at Ladysbridge Cottages	Boyndie	45		Provision of change with no or minimal effects	OUT	Preferred
BB017	South of Allochy Road, Inverallochy Airfield	Inverallochy	85		Provision of change with no or minimal effects	OUT	Preferred
BB018	South of Allochy Road, Inverallochy Airfield	Inverallochy	95		Provision of change with no or minimal effects	OUT	Reserved
BB019	Birnie Woods, North of Muir Road	Memsie	30		Provision of change with no or minimal effects	OUT	Not Preferred
BB020	OP2 Colleopard Road	Banff	200		Provision of change with no link or pathway to qualifying features See OP2 Banff	OUT	Preferred
BB021	South of Muir Road	Memsie	70		Provision of change with no link or pathway to qualifying features	OUT	Not Preferred
BB022	Land West of Greenbank Gardens	Fraserburgh	95		Provision of change with no link or pathway to qualifying features	OUT	Not Preferred

BU023	OP1 and P2 South of Ritchie Road	Rosehearty	50	Business Units	There are no potential impact subject to connection to public drainage sewage system.	OUT	Preferred
BU024	Land North of Rathen Road	Cairnbulg	30		Provision of change with no or minimal effects	OUT	Not preferred
BB025	Land at Ladysbridge Village	Boyndie	129	Employment Land	Provision of change with no or minimal effects	OUT	Preferred
BB026	Land at Mill	Boyndie	20		Provision of change with no link or pathway to qualifying features	OUT	Not preferred
BB027	West Church Street	Fordyce	5		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BB028	OP3 Durn Road	Portsoy	125		Provision of change with no link or pathway to qualifying features	OUT	Not preferred
BB029	Land East of Redwell Drive	Whitehills	30		Provision of change with no link or pathway to qualifying features	OUT	Not preferred
BB030	OP1 Knock Street	Whitehills	30		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BB033	Site adjacent to The Firs	Crudie	4		Provision of change with no or minimal effects	OUT	Preferred
BB034	Land North and East of Rathen West Church	Rathen	10		Provision of change with no or minimal effects	OUT	Not preferred
BB035	Land at Tyronhill Farm	Fraserburgh	Not known		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BB037	Land South of Law of Doune Road	Macudff	41		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BB039	Land South and East of Myrus Circle	Macduff	Not known		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BB040	Land West of Corskie Drive	Macduff	Not known		Provision of change with no link or pathway to qualifying features	OUT	Reserved

Housing Sites and ancillary development in Buchan

BID Ref	Site Name	Settlement	Housing Units	Other associated developments	Screening reference and comments	Screen in/Screen Out	Preferred/ Not preferred /Reserved
BU001	Land west of Site OP1	Ardallie	Not known		Provision of change with no or minimal effects	OUT	Not preferred
BU002	South of Nether Aden Road	Mintlaw	50		Provision of change with no link or pathway to qualifying features	OUT	Preferred
BU003	Nethermuir Road Site	Maud	21	Retail units	Provision of change with no or minimal effects	OUT	Preferred
BU004	Land at Ravenscraig	Inverugie	16		Buchan Ness to Collieston Coast SAC and Buchan Ness to Collieston SPA is set to the south east. The site is within a flood plain and this would enable higher chance for contamination on the qualifying sites.	IN	Not preferred due to site is within flood risk zone
BU006	Land to the West of Stuartfield	Stuartfield	60		Provision of change with no or minimal effects	OUT	Not preferred
BU007	Land to the west of Stuartfield	Stuartfield	20		Provision of change with no or minimal effects	OUT	Reserved

Shaping Development in the Countryside	General statement of the importance of rural development to the area	Screened out: This is a general statement of policy
Policy R1 Special rural areas	Statement as to planning policy in the greenbelt and coastal zone	Screened in: The development it promotes is specific to individual sites and requires the application of other policies designed to protect European Sites
Policy R2 Housing and employment development elsewhere in the countryside	General policy on the acceptability of development in the wider countryside	Screened out: This is a general criteria based policy
Policy R3 Minerals and hill tracks	Provides the planning context for Minerals developments and Hill tracks	Screened in: The development it promotes is specific to individual sites and requires the application of other

		policies designed to protect European Sites
Shaping Homes and Housing	General statement on the need for new homes in the area	Screened out, This is a general statement of policy
Policy H1 Housing land	Promotes the development of opportunity sites identified for housing	Screened in: The development it promotes is specific to the allocations made and until the allocations have been checked individually for the likelihood of significant effects, the policy cannot be screened out
Policy H2 Affordable housing	Sets a mechanism for the provision of affordable homes	Screened out: There are no conceivable effects on a European Site.
Policy H3 Special needs housing	Statement on the provision of homes for special needs groups	Screened out: There are no conceivable effects on a European Site.
Policy H4 Residential caravans	Statement on the undesirability of caravan development	Screened out: There are no conceivable effects on a European Site.
Policy H5 Gypsies and travellers	Statement on the provision of sites for Gypsies and Travellers	Screened out: There are no conceivable effects on a European Site. This is a general statement of policy.
Shaping Places – Layout, Siting and the design of new development	General statement of policy on design	Screened out: This is a general statement of policy
Policy P1 Layout siting and design	Sets out the criteria under which design quality will be judged	Screened Out: This is a general criteria based policy
Policy P2 Open space and access in new development	Seeks open space within development allocations	Screened out: There are no conceivable effects on a European Site.

Policy P3 Infill and householder developments	Promotes the development of previously developed land	Screened out: There are no conceivable effects on a European Site.
Policy P4 Hazardous developments and contaminated land	Prohibits development on hazardous sites	Screened out: There are no conceivable effects on a European Site.
Policy P5 Digital Infrastructure	Provides for the planning of digital infrastructure	Screened out: There are no conceivable effects on a European Site.
Policy P6 Community infrastructure	Allows for the development of community infrastructure outwith settlements	Screened out: There are no conceivable effects on a European Site. Existing policies provide sufficient protection.
Natural Heritage and Landscape	General statement of policy	Screened out, This is a general statement of policy
Policy E1 Natural heritage	Protects international, national and locally important species and habitats	Screened out: The policy is intended to protect the natural environment
Policy E2 Landscape	Protects landscape character and Special Landscape Areas	Screened out: The policy is intended to protect the natural environment
The Historic Environment	General statement of policy	Screened out, This is a general statement of policy
Policy HE1 Protecting historic buildings, sites, and monuments	Protects historic and culturally significant structures	Screened out: The policy is intended to protect the historic and cultural environment
Policy HE2 Protecting historic and cultural areas	Protects historic and culturally significant sites	Screened out: The policy is intended to protect the historic and cultural environment
Policy HE3 Helping to reuse listed buildings at risk	Promotes the redevelopment of listed buildings	Screened in: The development it promotes is specific to individual sites and requires the application of other

		policies designed to protect European Sites
Protecting Resources	General statement of policy	Screened out: This is a general statement of policy
Policy PR1 Protecting important resources	Conserves important economic and environmental assets	Screened out: There are no conceivable effects on a European Site.
Policy PR2 Protecting important development sites	Conserves important development sites from other developments	Screened out: There are no conceivable effects on a European Site.
Policy PR3 Waste facilities	Provides a framework for the consideration of the waste needs of new developments	Screened out: There are no conceivable effects on a European Site.
Climate Change	General Statement of Policy	Screened out: This is a general statement of policy
Policy C1 Using resources in buildings	Provides a mechanism to conserve resource use in buildings	Screened out: There are no conceivable effects on a European Site.
Policy C2 Renewable energy	Provides for the development of renewable energy	Screened in: The development promotes is specific to individual sites and requires the application of other policies such as environment policies designed to protect European Sites. The development it promotes is specific development and requires other relevant policies to protect the European Sites.
Policy C3 Carbon sinks and stores	Conserves areas where carbon is stored in perpetuity	Screened out: There are no conceivable effects on a European Site.

		This is a national project, identified in National Planning Framework 3.
Policy C4 Flooding	Provides a framework to protect against flood risk.	Screened out: There are no conceivable effects on a European Site.
The Responsibilities of Developers	General Statement of Policy	Screened out: This is a general statement of policy
Policy RD1 Providing suitable services	Seeks appropriate infrastructure works to serve new developments	Screened out: The development it promotes is specific to individual sites and requires the application of other policies designed to protect European Sites.
Policy RD2 Developers' obligations	Sets out a framework for seeking contributions from developments to public infrastructure costs	Screened out: There are no conceivable effects on a European Site.
