Stonehaven Flood Protection Scheme

Work Experience Opportunities

Would you like to learn more about what the construction industry can offer as a career option? e.g.:

- Civil engineering
- Quantity Surveying
- Ecology
- Health & Safety
- Administration
- Communication/Community Liaison

A work experience can enable:

- Students to improve their employment prospects by developing the skills they need to be work-ready
- Schools to offer the best work experience placements to students to help them develop job-specific skills alongside their studies and improve their chances of employability
- Innovation in work experience: varying lengths – a day, a week, a month, a year

Does this sound like something you would like to do?

Send your details to:

Sheila Tolmie
Community Liaison Officer

at Stonehaven.community@mclh.co.uk
