# 1. Overview

This document has been generated from information entered into the Integrated Impact Assessment system.

All sites that have less meals than 35 per day that is currently a production kitchen would change to a canteen and another school that was in close proximity would become the production kitchen for that school. Some other schools above the 35 meals would also be looked at from an operational point of view. This would have a reduction on staffing hours, kitchen and equipment use and still provide a great service as we do successfully in many other canteens.

During screening 1 of 10 questions indicated that detailed assessments were required, the screening questions and their answers are listed in the next section. This led to 1 out of 5 detailed impact assessments being completed. The assessments required are:

- Sustainability and Climate Change

In total there are 4 positive impacts as part of this activity. There are 0 negative impacts, all impacts have been mitigated.

A detailed action plan with 0 points has been provided.
