FORMARTINE

Aberdeenshire is divided into six administrative areas: Banff & Buchan, Buchan, Formartine, Garioch, Kincardine & Mearns and Marr. The areas consist of groups of three multi-member council wards, with the exception of Garioch which contains four. Results from the 2011 Census have allowed us to look at the various characteristics of these areas.

Population
Population size in the administrative areas varied from 52,400 in Garioch to 37,100 in Marr. Banff & Buchan had a similar population to Marr at 37,300 and the other administrative areas had populations of between 40,500 and 43,000. The male/female ratio was roughly similar in all areas.

Ethnicity
Aberdeenshire's population was largely composed of white ethnic groups. Amongst the administrative areas Garioch had the lowest percentage in these groups – 97.7%. Marr had the lowest proportion of people in the 'White: Scottish' group and the highest proportion in the 'White: Other British' group. Banff & Buchan was unusual in having 3% of its population in the 'White: Polish' group and 3% in the 'White: Other white' group, which is likely to contain a high number of people from other EU countries. Buchan had 3.1% in the 'White: Other white' group.

Age Profile
Garioch was the area with the youngest age profile, with 20.1% of its population aged fifteen or less, compared to an overall Aberdeenshire figure of 18.8%. Banff & Buchan and Buchan had the next highest proportions in this age band, 17.7% and 17.5% respectively. Banff & Buchan also had a relatively high proportion of its population falling into the 75+ age group – 8.3%. However Marr had the oldest population profile with 9.6% of its population being aged 75+, compared to 7.2% in Aberdeenshire overall. Marr had the greatest proportion of people in very old age groups too, as almost 1% of its population was over 90 years old.

Health
In Aberdeenshire overall 84.5% of people reported that their day-to-day activities were not limited by any health problems. There was, however, some disparity between the administrative areas with 87.6% of people in Garioch reporting this and only 79.9% in Banff & Buchan (the highest and lowest figures amongst the administrative areas). At the opposite end of the scale 9.1% of people in Banff & Buchan and 4.1% of people in Garioch said that their day-to-day activities were limited a lot by health problems.

Employment
For the total population aged 16 – 74, all administrative areas had employment rates that were higher than the Scottish rate of 60.5%. They varied from 63.6% in Banff & Buchan to 73.5% in Garioch. Unemployment rates were correspondingly low, varying from 3.5% in Buchan to 1.9% in Garioch. The proportion of people who were self-employed was highest in Marr, at 13.2%, whilst Buchan had the lowest self-employed rate, at 8.9%. Banff & Buchan and Marr had the highest retirement rates of 15.8%, reflecting their older age profiles. Garioch had the smallest proportion of people retired, 9.3%.

Industry
For Aberdeenshire as a whole the two sectors which employ the most people are 'Wholesale and retail trade, repair of motor vehicles' and 'Human health and social work activities' and this pattern is seen in Formartine, Garioch, Kincardine & Mearns and Marr. However the sector which employs the most people in Banff & Buchan and the second highest number of people in Buchan is 'Manufacturing'. The proportion of people employed in Banff & Buchan is 16.4% which is more than twice the Scottish rate of 7.7% and substantially above the Aberdeenshire rate of 9.9%. Buchan's employment rate in this sector is not quite so high at 13.5%, but again is noticeably above the Scottish and Aberdeenshire rates.
