

Settlement Summary: Edzell Woods

Population: 346

Observations (of Community Council)

The local community did not consider there to be any problems or obvious opportunities with regard to open space in Edzell Woods.

Green Network Links

Due to the size of the village, there is no issue at present with lack of green links to the surrounding countryside.

Open Space Requirements

Although the Community Council did not identify any obvious improvements, there may be a case for updating or replacing some play equipment in light of the play value audit being undertaken by the Council. In the event of a major application at the former air base, proposed factors to be considered at masterplanning stage would include, for example, the need to provide an area of accessible woodland accessible for future residents, as well as civic space, including residential streets in accordance with national and local policy requirements.
