

Vote Daniel Leask for Foveran and Newburgh Community Council

My name is Daniel Leask and I am a candidate for a position on the Foveran and Newburgh Community Council. If elected I will serve to think of new ways to improve the local area for people living nearby, and I will ensure that the people of Foveran and Newburgh have their requests heard.

I believe that I would suit this position very well as I am a polite and understanding person, making accepting suggestions easier, and I am resourceful, so I can find a solution to most problems while staying within the community's budget.

Given a position on the council, I would try to find ways to lower how much we are spending so that money could be used on improving and maintaining the local area. Improvements could include:

- Improving the bus timetable to and from the towns
- Installing more speed cameras on the main road past Foveran primary school to reduce speeding issues
- Providing more opportunities for young people to start small businesses or earn money through local jobs

These are a few of my personal ideas, however, I am very open to suggestions and ideas from other members of the local communities. I plan to set up areas within the school where your suggestions can be written down for me to find. I am hopeful that these similar areas can be set up in both Foveran and Newburgh as well, for the residents of those towns.

However, I would also be open to direct suggestions to me in person and would be certain to ensure that the council considers each idea, and hopefully each idea will find some way to improve the towns.

Allowing me into the council will make your ideas more likely to be considered, and I would very much appreciate your help to earn that position in the upcoming election.
