

# Liberal Democrats Manifesto

## Jamie Brown

I am in my second year and am a hard-working and conscientious pupil. I believe that everyone has equal rights and should be treated fairly. I have a great interest in politics and I know I am the right candidate for you.

## A vote for me is a vote for change!

### Environment

Climate change is getting worse and could destroy our way of life. The children of today will suffer most if we don't act now, so Liberal Democrats believe that there is a huge opportunity to get out of this recession by going green, strengthening the economy, creating new jobs and improving the quality of people's lives. We will make energy companies charge less for the many that struggle to pay bills.

Liberal Democrats will invest in a lot of renewable energy such as wind, wave and solar.

Unlike Labour and Conservative, we do not support the construction of Nuclear Power Stations as it increases national security risks.

### Economy

Liberal Democrats are going to make rich people and big businesses who avoid tax, pay their fair share.

We believe that as soon as someone loses their job they deserve immediate help to find another one, we will no longer have the frustrating moment when you discover you will have to wait 1 year for another job. We need to keep young people within grasp of the job market and we'll make it happen by paying any young person completing an internship or work experience £55 a week for three months. At the moment only children from fortunate backgrounds can afford to do so, but soon people from all backgrounds will be able to.

### Health

We will give you the power to comment on how the local NHS is run and stop hospital closures, and we will half the size of the Department of Health in the next parliament, to increase efficiency savings. We would set a rule that no more than one organisation can ask the same question to a hospital or any other health trust.

## Education

To help every child get the help they need, we will cut class sizes, run catch-up classes and spend an extra 2.5 billion on schools, to make sure children who need extra support get it.

Far too many children are leaving school early, without the knowledge to become successful. The curriculum doesn't stretch the brighter kids, and that makes it harder for the less bright kids to get help.

In further and higher education, we plan to get rid of tuition fees. We believe universities should be free.

## Equality

At the moment Britain is multi-ethnic. Lib Dems embrace a diverse Britain; we recognise the different experiences of male female rich poor homosexual, heterosexual black white or Asian.

We will ensure there is no discrimination on women, and they will receive 20 hours of free childcare.

**We are the only Party  
that believes in  
fairness!**
